The Georgie left for New York the same evening with three hundred passengers, the other side is in fine order and made a very quick trip down. There was nothing of any note transpiring on the Isthmus; the railroad is progressing rapidly, and the bealth is now very good. There had been quite a number of arrows of native lately by the New Uronada Government, and the effect was very good on the remainder. By the Falcon we have received our files of California papers to the lat October, inclusive. They are nearly barron of interest. Little of importance had transpired since the sailing of the previous staenuer. San Francisco had been somewhat sickly, and exaggerated reports of the prevalence of the cholera prevailed—at the last accounts, however, the city had resumed its wouted salobrity.

Politics are running very high in California. The Alla California of the 99th says:

The enthusiasm and excitement constantly waxes greater as the day of election approaches. The primary election for Delegatus to the Democratic County Convention takes place on Tacaday part, and of course those interested are busy. These elections generally have been at best but a humbug, and it is to be heped that measures will be taken to conduct them in a manner as as to express the will of the people. Of course there is no scarcity of candidates who seek for nominations, and to accomplial that
