WOMAN'S RIGHTS. The annual farce of a Woman's Bights
Convention was performed in New York on
the 1968 the performed in New York on
the 1968 the performed in New York on
the strong minded—our' spinsters, whose
roses have long since withered on the virgin
thorn; statternly matrons, whose hosesholds
and children are sacrificed to the prurient
ambition of display; tyramical Xarurras,
whose hatbands are reduced to cyphera,
and simpering Misses, who fancy their
attractions will be enhanced by the assumption of airs of detant independence of masand simpering Misses, we handy the assumption of airs of defaut independence of managing authority. There, too, were to be seen the Rev. Airconstruct Brown Blackward, whose smacolline genius scorns the restraints of the petitional aimost as much as the fetters of mairimony; there was Loussita Morr, the most begreering of philantropists, and Suzus Mineyer, the ferocious Bloomerite, and Russeymar Ross, who, even in the sere and yellow last, shottes not one jot of her abhorrence of man's despoism. The eternal Westerli. Printing was, of course, a compoleous feature lythe Convention. He some restraint, and hatred to the Bouth are to be found. Among Atheists, Abolitionists and Woman's Rights advocates he delights to dwell. The audience was immense, and hieses, shouts, laughter, and other demonstrations more emphatio; than respectfal. The magail farrage of nonsense was uttered. After, Does doied forth sundry extracts from the writings of Mary Wollersongary and Mar-determined effort to enlighten the audience when the whisting and stamping rendered her absolutely insudible. Then followed Lucarra Morr, who talked of progress, sulegized Hierary Ward Brackers, indulged in a fing at the slaveholders, and would have bestowed an encomium on Gazzinow, if the audience had not set up such a terribbe hooting and yelling and comple her to absolute him to the stample of the series of the wrongs of woman. She contended that the winder that man robbed woman of every possible right, his strove to prove that woman had no indisence—an assertion which man had no indescent as the state with an improved berreif, but which every man who has been humanized and refined by the gentle ministering of vije, or mother, or circle of female friends, knows to be false. However, Dr. Baoww, in spite of much sophistry and a vaset amount of prejudice, delivered an interesting and not altogather uninstructive dissource. She is a woman of talent, and with a strong substratum of common sense, would be and ornament to scolety.

The indomitable Mrs. Beest made a flery sphech on the necessity of giving to woman a voice in the government of the nation, but she uttered so much scandalous vituperation of the other sex that the audience waxed angry and intelerent, and forced the virago to close abruptly.

Of course the inevitable Phillips had been say, and we must acknowledge that he is as

He spoke with marked warmth and power in reference to the Signify trial, and shood up manfully for he unhappy wife, who, "young, beautiful, iducated without a purpose in life, brought ip as all women in fashionable life are, a nere toy, he example of right thought or to revolutionize society by their movements, and remove woman from the sphere to which she naturally belongs, and whither she in

presents perhaps the Cake East Pascagouia presents perhaps the greatest number of advantages. It is admirably situated on the ing places across the Lake East Pascagouis prescula perhaps the greatest number of advantages. It is admirably situated on the waters of Lake Borgne, which are extremely siline, and therefore particularly agreeable and switche for bathing. Some time since a maggificent botel was commenced at East Pascagoela. It is said, in point of comfort, spaniousness and position, to be one of the finest ever constructed. It needs, however, completion, shed this can be effected at a cost et ent thousand dollars. It is to be hoped that the host of editizens who annually frequent our watering places will not permit this splendid edifice to remain unfinished for so small an amount.

Manuryllie Farct Gossman.—Families who contemplate passing the summer at Mandeville will be pleased to learn that Mr. Morphy's forcery store, well stocked with wines the form an unique and specially attractive element in the presentation.

The Merphy Testimental.

The following description of the set of chessmen which is to be presented to Mr. Morphy upon his return from Europe appears in a New York paper: The white pieces are of solid silver, and the black pieces of solid gold, standing upon bases af correlian—the metal being covered, in all cases, with elaborate and delicate workman. Stips The Payna, Bichope Carlotter and the property of the Payna Bichope Carlotter and the Payna are forest and the part of the Payna are forest and the part of the phants, each with a hough upon his back, surmounted by a spread eagle. The white Payna are Gottic belligerents, with clubs and helmets, and are dressed in akins, with the horns of the animal projecting from their heads. The black Pawns are less barbaric soldiers, armed with the shields and short swords of the Roman legioury. The Bishops are part of the Roman legioury. The Bishops are part of Mercury's wings. All the royal personages bear globes or balls upon their heads in place of the crowns, which lie unused at their fest. Upon the shield of the white King is seen the motto, "Liberty."

The chese-board is a splendid piece of workmanship, and earlies. The border is made of silver, and will exhibit at each conner, encircled in wreathes, the large with a standard and two in the background. The properties of the front pyramid, and on its face are engraved the names of the following eminent chess-players: Morphy, McDonnell, La Bourdonnias, Lope, Philidor, Bean, Bliguer, Petroff, Kieseritaky, Von der Lasa, Anderssen, Lowenthal, Harrwitz sun bange.

The second represents a shield, with the mounted with a weath, and surrounded with a mounted with a weath, and surrounded with a mounted with a weath, and surrounded with a weat

Baltimorr, May 13.—The new engine house of the Philadelphia Railroad Company, on Canton avenue, was totally destroyed by fire early this morning, together with five locomotives and a stationary engine. The fire originated from sparks from a freight locomotive, the fire in which had not been thoroughly extinguished.

The fire broke out about two o'clock. The loss on the building is \$5000; from \$5000 exch on the locomotives, and \$4000-on the stationary machinery. The engines and house were fully insured; half in the Battimore Firemen and the Baltimore Fire losar ance Companies. The total loss will be about \$20,000 or more.

EXTRAORDINARY DISCOVERY-Photographic Sound.—In another part of our columns will be found the details of a very singular discovery of M. L. Scott, by means of which sounds may be made to record themselves whether these sounds are those of musical instruments or amitted by the voice is nice.

EPPECTS OF TORACCO ON THE MOUTH.—Both smoking and chewing produce marked alterations in the mostexpressive features of the face. The lips are closed by a circular muscle, which completely surrounds them and forms their pulpy fallness. Now, every muscle of the body is developed in precise ratio with its use, as most young men know; they endeavor to develop and horease their muscle in the gymnusium. In spitting and holding the cigar in the mouth this muscle is in constant use; hence the coarse appearance and irregular development of the lips, when compared to the rest of the features, in chevers and smokers. The eye loses its natural free and becomes dull and lurid; it is unspeculative and unappreciative; it answers not before the world; its owner gazes wacanly, and often rapels conversation by his stupid-ity.—Scalpsi.
