PLATINA CEMENT
DR. ACHILLE LION, Dentist, of the Faculty of Paris, after many researches, has discovered the valuable composition, which he applies with the utmost success in plugging decayed teeth, and ameliorating tooth-ache. The composition of the Platina Cement, which is entirely mineral, is not corrosible; it is used cold, almost in a liquid state, and speedily acquires the hardness and consistency of the enamel of the teeth; it preserves them for many years, not only as a preservative of the tooth, but also to render extraction unnecessary.
Office, No. 78 Royal street, between Conti and St Louis streets, fronting the Louisiana State Bank.

DR. WRIGHT'S ASIATIC TOOTH WASH is now offered to the public, as the most effectual preparation for the preservation of the teeth, and purification of the mouth and breath.—This liquid has the properties of dissolving and removing from the teeth all deposites from the saliva without injury to the enamel, which it leaves white and smooth.
It cures the scurvy, strengthening and hardening the gum, causing them to adhere strongly to the teeth, whereby the latter are re-rooted firmly in their sockets, and imparts to the breath an agreeable odor.
It can be obtained at the store of Messrs. Hyde & Goodrich, 18 Chartres street.
