licit subscriptions to the fund for
celebration of Lafayette's birthday,
September 6th. Donors are requested
to make their checks payable to "The
Lafayette Birthday Celebration."

HAPPENINGS 69 YEARS AGO.

(By Count de G. —)

A cable has been extended from the
American to the Canadian shore, be-
low the Falls of Niagara, as a prepara-
tory step to the erection of a suspen-
sion bridge. The process by which this
was accomplished is thus described:"A twine was first sent across the
chasm attached to a kite. This done,
the process of drawing over cords of
increasing size and strength was an
easy and simple task."The entire white male population of
the State of Louisiana, Parish of Bossier
excluded, is, 106,391; white fe-
males, 90,902; colored males, free, 8,-
84; colored females, free, 10,877; male
slaves, 109,275; female slaves, 102,978.The returns from Bossier parish
were lost, or destroyed in the con-
flagration of the steamer Hecla, while
coming down the river.There are no lawyers in the British
colony of Honduras, except an attorney
general, and none others are per-
mitted to exercise that vocation. An
effort is now making to introduce a
"limited bar", but there is so much
opposition to the measure that it will
hardly succeed.It is stated in one of the New York
prints, that several capitalists in that
city, have united and offered Mrs.
Mira Clark Gaines the sum of \$5,000,-
000 for her claims lately decided in
her favor, in the United States Su-
preme Court.The New York Herald closes an edi-
torial on the life and death of John
Quincy Adams as follows: "Mr. Al-

TO THE PUBLIC.

The New Orleans Bee, No. 520 Conti St., is prepared to publish in its daily paper all legal and judicial advertisements and notices at the rate of three and a half cents per agate line, net, payable cash in advance, instead of seven (7) cents per agate line as heretofore.

ans, on all occasions, we believe, has been open, pure, and uncontaminated—as single-hearted as a child or an angel. When his soul took its flight from the House of Representatives at Washington, it was a PURE SPIRIT PASSING FROM A DEN OF THIEVES, PLUNDERERS AND ROBBERS, to the brightest mansions and purest spirits of eternity.—What a happy change! What a glorious change!"

Davey's volcanic theory.

Potassium is lighter than water. It breaks into flame the moment it touches water or ice. If plunged into the water there is no combustion, but hydrogen is discharged without turbulence or resistance. These remarkable, but far from anomalous properties, suggested to the teeming mind of the electro-chemist Davey, the conjecture that the solid body of the world is composed of potassium and the metals that resemble it; and that volvanised eruptions are produced by the occasional incursion of the waters of the deep, or of great mountain tanks, on the still domain of these atlantic metals. The far greater part of the investigated crust of the earth is certainly composed of such oxidated metals, and the specific gravity of the whole globe is supposed to be less than that of the rocks; so that it is at least possible that there may be more of sound prediction in this sublime conception, than the majority are inclined to think.

(To Be Continued.)

Trade Edition of the New Orleans
Bee.

Pursuant to its annual custom, the Bee will publish a Trade Edition covering the civic activities of the Crescent City during the twelvemonth ending August 31, 1916.

This issue of the Bee will be printed on Sunday September 3, instead of the usual date, September 1 so as to give its readers, in the same number of the paper in addition to the many special articles in the fields of literature, arts and sciences, and general topics, a most comprehensive résumé of the progress of New Orleans in all its various branches of industry, commerce, finance, and municipal ad-
vancement.

The articles, carefully written, from information and data obtained from authoritative sources, will show the wonderful strides taken by the city of New Orleans in the extension and expansion of its internal and external trade, in the substantial growth of its urban development, such as improved port facilities, important additions to the already excellent system of public utilities, and the solid and constant increase of the commercial and financial business of the metropolis of the South.

The Bee, with its eighty-nine years of continuous existence, having a class of readers, among the French-speaking population of the city and State, that is reached almost exclusively by this newspaper, the only French daily in the United States, outside of New York and San Francisco, offers a splendid field to advertisers desiring to reach a certain class of people many of whom are neither readers nor subscribers of newspapers printed in English.

MERCHANTS and business men are invited to consider the claims of the Bee to their patronage, and to extend to it their advertising favors. The outlook, thus far, is very encouraging, our solicitors bringing in many important advertisements; but there is ample room for more, as the size of the paper will accommodate itself to the volume of advertisements that will be sent in.

Our rates are very liberal.
