Sprint output walk through

- ✦ Universal Language Selector update
- ✦ CentralNotice/Translate integration
- ✦ Plural forms broken in 1.20wmf11
- ✦ VisualEditor and language support

Universal Language Selector

Developments in sprint 24

- Compatible with Narayam
- Monospace font issue
- Behavior of Cancel button
- Show common languages on Worldwide
- Dropped compatibility with IE7 (may work, but with degraded visual appearance)

More at: [\[\[mw:Universal_Language_Selector\]\]](#)

CentralNotice/Translate

Integration

- Use Translate for all or most translations for more consistent process and less work
- Can create message group from Central Notice now
- Next steps (21 September)
 - Status based usage
 - Deal with edge cases

Plural broken

After CLDR integration

- Broken for some languages with no plural forms set in CLDR data in 1.20wmf11
- Unnoticed because of incomplete test coverage
- Fixed in 1.20wmf12

VisualEditor and languages

Bullet points and planning based on meeting

- ✦ VisualEditor highly depends on browser technology
- ✦ Only the more recent browsers are supported
- ✦ Currently input methods are insufficiently supported
- ✦ Analysis to start 2 October
- ✦ Resolving issues to start 16 October
 - ✦ Localisation team to support VE team with test cases and (some) QA
- ✦ By end of October, most pressing issues should be resolved

Other deliverables and news

- Investigated possibilities for Wikimedia content in Indic languages on mobile platforms
- Continued outreach through blogs (see links on next slide)
- Right-to-left bug fixes
- Code review & other fun stuff

Goals Sprint 25

- Office hours tomorrow 15:30 UTC in #mediawiki-i18n
- Most Localisation team members in San Francisco
- Hacking on CentralNotice and Translate integration
- Internationalisation of ULS
- L10n support for jQuery.i18n in Translate
- Design review of ULS
- Completion of designs for Translate UI/UX
- Information exchange day with Google's i18n team
- Blog posts on sprint, jquery.i18n and user experience testing
