* Disclaimer: The **dell vostro 3555 laptop batteries** offered by us are compatible with certain products of batteries manufacturers. All the information presented on this website may contain references to products or trademarks maintained by such manufacturers, which is solely to show the **laptop computer batteries** with which our products are compatible. Besides, our company and website are neither related in any way with these manufacturers nor are the products listed in our website manufactured by those batteries manufacturers.

Activate new dell vostro 3555 laptop battery

The new notebook computer should get small electricity for the first time. To activate the new **dell vostro 3555 battery**, should not use the outer power first, but use up the energy of battery until the notebook shut down. Then charge the **dell vostro 3555 battery** with the outer power until the indicator light go out. Then use up the energy again. Repeating 3 times to activate new laptop battery.

How to properly charge the dell vostro 3555 battery

You should be avoid using up the **dell vostro 3555 battery** power before charging the battery, because this will give the battery a lot of pressure and resulting in damage. A more feasible approach is to charge the battery when the battery remain about 20-30% of power. In fact, the notebook lithium battery in the number of "use up / charge" times is limited, all used up and then charge will greatly shorten the battery life. At the same time, the **dell vostro 3555 battery** should be charged in a dry place, and you should also pay attention to the heart problem.
