Sadie was taken ashore to military headquarters at Honolulu and afterwards released.

THE COMING CITY OF BRAZIL

United States Consul Writes of the Remarkable Commercial Development of Para.

The annual report of Consul Kenneday, of Para, to the bureau of foreign commerce, state department, presents striking picture of the remarkable development of the United States' trade with Brazil. Speaking particularly of his own district, he says there has been broad and steady expansion of trade throughout the state of Para and the Amazons. He predicts that the city of Para will become the Chicago of South America, situated as it is, near the mouth of the great Amazon, and commanding its trade. Two lines of steamers running between that city and New York are increasing the number of their ships and are still entirely unable to carry the heavy freight, although the service has been increased from one trip per month to three trips and it is to be further increased January 1 to one every week.

Speaking of trade conditions in detail he says, most merchants require from 90 to 150 days' credit and Germans stand ready to meet all requirements and competition. We furnish already all the provisions to Brazil and our shoes are securing quite a foothold. There is a broad field of expansion in machinery, hardware and cutlery. The marked development in trade during the past six months has been in the bicycle, and official tests have demonstrated that the American wheel outclasses all others.

PROPOSED BY MAIL.

Happy Culmination of a Courtship Carried On by Means of Letters.

Robert S. Barrett, son of the late Rev. R. S. Barrett, of Atlanta, Ga., and who is now assistant editor of a paper in Mexico City, was the other day married at the Grady hospital to Miss Viola Tupper, daughter of Rev. T. C. Tupper, Portsmouth, O. Mr. Barrett left At-land five years ago. At that time he had a slight acquaintance with Miss Tupper, which the young folks improved by frequent correspondence. Through he agency of the mails Mr. Barrett made a proposal of matrimony and was accepted. When he arrived at Atlanta to marry Miss Tupper he found her at the hospital critically ill with typhoid fever. He waited until she was convalescent, and then married her as soon as she was strong enough to participate in the ceremony. He has returned to Mexico, where she will follow him as soon as possible.

Modern Methods in Ancient Mimes. The salt miners of Wiellezka, near Cracow. Poland, were mentioned in 1044 and have been working since 1240. The first man of the mines was made in 1638 by Martin German, a Swedish mine surveyor. The eight shafts now in existence are from 207 to 985 feet deep, and the length of the levels now open is 345,000 feet, with 115,500 feet of underground tram lines. Between 1772, and 1892 about 3,000,000 cubic yards have been excavated for the extraction of salt. Machine drills are now used and compressed powder is employed in blasting; about 1,187 pounds of powder are used per ton of salt produced. The present levels are 71/4 feet high by 64 feet wide.

Iconoclasm in Edinburgh. The authorities of Edinburgh, Scotland, are disposed to be iconoclastic. The old house in High street where Allan Ramsey lived has been demolished in order to effect improvements, and other old buildings in which the national covenant was signed in 1638, will also be pulled down. The muchvisited house of John Knox is, it is said, claiming the attention of the authorities, who regard it as an obstruction to the street traffic, while the Iron church, long associated with the bacchanalian observance of Hogmanay by Edinburgh citizens, will most likely have to be sacrificed.

Costly Set of Teeth. Probably the most expensive set of false teeth known is that of the nizam of Hyderabad, for which he has paid 7,000 rupees (\$3,500 in theory, but \$1,750 in fact), to a Madras dentist. shooting ground for the crown prince. those of day birds.

COWBOY PREACHER.

Starts In with the Intention of Converting Gotham.

ligious Work-Does Not Believe in Sudden Conversions.

A western evangelist has come all the way from San Augustine, N. M., to subdue the windmills of vice and destruc-Rev. Hamilton Dawson is the man,

Rev. "Ham" Dawson, as he wants to be known, says his ideas of evangelism five cents from any man at a meeting

"No man was ever converted in one time after the ship got outside. Her minute or two minutes, or two months," disguise was sufficient to protect her he said after he had finished his sermon. for 48 hours after sailing from San 'Sam Jones claims to have converted Francisco. But the officers finally dismen by looking at them, but I know dif-

"I intend to convert New Yorkers slowly. I want them to learn the Gospel the modest sum of \$10 for breaking the | by degrees and when they feel sure they can meet their Maker with a contrie heart then let them say so. Nothing is ever accomplished in a day. My plan wouldn't work out in San Augustine. The boys out there won't take to Christianity with a whoop. They say it is meant only for women.

"I was a cowboy once and I took to reading Moody's sermons, and then I heard Sam Jones, and one night I was talking against him and I made such a good argument that the boys said I'd do for a preacher, so I started out. I have succeeded in converting 32 men in New Mexico, but the field there is too small. I came to New York because I heard it was wicked, and would be a good field."

Rev. "Ham" Dawson is tall and angular, clean shaven and bald. He wears his trousers inside his boots and a great, wide sombrero. His voice is strong and clear and his words are full of convic-

CARNEGIE AS A JUROR.

Obliged to Serve in the Trial of Crim inal Cases in New York City.

Andrew Carnegie, the multi-millionaire and ironmaster, bowed to the law. apologized for having apparently lodged jury duty, and is now enrolled in the list of 3,100 specially selected citizens to try criminal cases in New York county, N. Y.

He was finally served at his house, 5 West Fifty-first street, early this month, but he did not obey the summons until the other morning, and after a warrant for his arrest had been sworn out. This warrant was placed in the hands of Under Sheriff Mulvaney, but as Carnegie sent word that he would appear before Commissioner Gray he was not arrested.

The usual questions asked a juror were propounded to Mr. Carnegie when he appeared before the commissioner. Some of them were:

"Could you find a woman guilty of murder in the first degree, Mr. Caraegie?" "Yes I could find a woman quilty."

"Could you try a woman in the same spirit as you would a man, without any partiality on account of her sex?" "I could."

"Have you any conscientious scruples with respect to the death penalty which would prevent your finding a verdict of guilty in a capital case?"

"I could find anybody guilty of murder, but I do not believe in the death penalty."

NEW PUZZLE IN FAMILY TIES.

Eighteen-Year-Old Missourian Marries His Stepmother's Stepmother.

Oliver Clement, aged 18, was married at Poplar Bluff, Mo., to Mrs. Hannah McGinnis, aged 50. She was his stepmother's stepmother. This is the strange story leading to the marriage: Andrew McGinnis, of Cole county, in his 60 years, was married five times. and is now living with the fifth wife. He had five children, four girls and one Minto particularly shone. boy-three by his first and one by his second wife. He was sentenced to 15 KILLS ALL HIS PET ANIMALS. served seven years, receiving a pardon. In Butler county he married his fourth wife, now Mrs. Clement. He was divorced from her, and has since married. His oldest daughter married John the army.

culiar blood and marriage ties that it and put a bullet through the head of takes quite a student to figure out just each. Then this strangely kind-hearthow each is related to the other. But ed man served his four horses in the

Island of Monte Cristo. Lovers of Dumas' immortal romance will note with interest the statement by the London Morning Post's Rome correspondent that the island of Monte Cristo, rendered so famous by Dumas' immortal romance, is about to be organized as a hunting ground for the later in the day a coolie arrives at your prince of Naples. The Italian news-papers add that the lease of Marquis Ginori, who previously hired the shooting in the island, has run out, and that the state is arranging to reserve the island-which is thickly wooded and

BRINGS HOME FINE SHIELD.

Maj. Gen. Osborn Has a Rare Memento from Argentine Republic.

A bit of history in which the United States acted the part of peacemaker in a serious dispute is called to mind by a shield which has been brought to Chicago by Maj. Gen. Thomas O. Osborn. The shield, which is valued intrinsically at thousands of dollars, was presented to Gen. Osborn in 1881 by the Argentine Republic in recognition of his part in adjusting the boundary line differences which brought that country and Chili to the verge of war.

The shield is 90 centimeters high by 74 centimeters wide, and was sculptured by Gustav Dore, whose signature it bears, as well as those of Vermer, the engraver; Camero Goldsmith and the famous Froment-Meurice, under whose directions the work was executed at Paris. The materials of which the shield is composed are oxidized silver, iron, gold and enamel.

In the center are three figures in relief, representing the Argentine and Chilian republics and the United States. the two former with hands clasped in fraternity and the latter with arms extended, offering to each of her sister republics an olive branch of peace. Beneath these figures are the arms of the three republics, embossed in gold. Surrounding these figures are the symbols of pastoral, agricultural and industrial pursuits. In the upper part of the shield is a band of gold entwined around sheaves of corn, palms and vines laden with golden grapes. Upon this band of gold is an inscription in Spanish briefly reciting by whom and for what reason the shield was presented.

DESIGN FOR \$1 CERTIFICATE.

New Silver Note Is a Beauty and Protected from Counterfeiting.

New designs for the one dollar silver certificates have been completed at the bureau of engraving and printing, and the notes bearing them will soon be issued. Clearness, simplicity and protection against counterfeiting have been the results chiefly aimed at.

The central device on the face of the note is an American eagle with wings partly spread, clutching the flag, and with the dome of the capitol in the background. Below the platform upon which the eagle stands are small portraits of Lincoln and Grant set in medallions. Large and clear figures are in each corner of the note and on the sides. The space between the central device and the lathe work at the ends is clear white paper, except for the imprint of the seal in one space and the denomination of the note in another. The seal upon the silver certificates will be in blue, and the figure in the open space will be in the same ink.

The mechanical work and the technical finish of the engraving are superior to anything ever before issued from the bureau. The reverse side of the note corresponds to the face in respect to the large display of white paper, without printing or lathe work. Large plain figures appear in each corner and scrolls make up an attractive border, but the only remaining space upon which printing appears is in the center, where the usual language regarding the qualities of the note as a tender for public dues is set forth. The object of a | Chemina de for urbatus. clear display of white paper on both sides of the note is to afford a safeguard against counterfeiting.

LORD MINTO A SPORTSMAN.

New Governor General of Canada a Warm Friend of Athletics.

The earl of Minto, in his function as governor-general of Canada, is likely to have an influence that is not generally expected from so lofty an official. The earl is, and always has been since his boyhood days at Eton, one of the keenest of sportsmen. As a gentleman jockey, both over jumps and ou the flat; as an oarsman, as a good man to hounds and in field athletics, the new governor-general has won renown.

Before he succeeded to the peerage and bore the courtesy title of Lord Melgund Lord Minto used to figure in the pigskin under the assumed name of 'Mr. Rolly." He was then a Cambridge undergraduate. While an undergraduate he was also prominent in athletics, and won the mile race in the Third Trinity sports at Cambridge. It was as an amateur jockey, however, that Lord
