FOR GOVERNOR

HENRY JOHNSON,

NEW-ORLEANS,
THURSDAY MORNING, JUNE 24, 1841.

NOTICE TO ADVERTISERS.

Advertisement out of the direct line of business of the yearly advertiser, such as legal, auction, and plantation sales, houses or lots of ground to let, leases or sell, runaway slaves, slaves and animals, &c. will be charged for separately and at the ordinary rates.

Mariage and obituary notices, and all others, the cost of which will not exceed \$5, are to be paid in advance.

We are frequently asked by strangers whether the weather will be healthy or not. Now we prefer to know little more of the intricate subject of epidemic than is derived from ten years' residence in New Orleans, coupled with some experience. All attempts to answer such queries satisfactorily are futile. The cause of epidemic visitation is involved in such abstruse mystery, that reasoning by analogy, and a accurate observation of meteorological coincidences constitute the only data from which inferences can be drawn. Yellow fever has been known to occur at almost every degree of heat between 60° and 90° Fahrneheit. It has broken out and proved highly fatal in seasons characterized by excessive drought, as well as during summers marked by frequent and heavy falls of rain. It has occurred in November and it has been known to make its appearance in June.

Still Yellow Fever, as far as we have learned, to form an opinion, does not generally break out until the latter part of July or the beginning of August.

Whether it appears, it is difficult to say, but we are confident in our judgment.

Whether it is to be expected that the weather of the month of June will be healthy or not, we cannot

know, as we have no record of the weather of June in New York, to which we have referred.

For these reasons, we are compelled to decline the offer of our services.
