To Whom It May Concern:

**Re: EMAD (MOHAMED OMAR) MOSTAFA KAYYAM**

I am proud to recommend Dr.Kayyam, for your postgraduate training and teaching program...

Dr. Kayyam is a highly intelligent, perceptive young man. He came to Egypt some years ago to study medicine in one of the newly evolved medical schools, affiliated to the 6<sup>th</sup> of October University. This outstanding medical school is under the supervision and full control of the Kasr Al-Aini Faculty of Medicine of Cairo University, the largest teaching medical institution in the Middle East. I participated as a delegate professor in teaching surgery to Kayyam and his colleagues, an also as a supervising and acting member of his final MBChB exam. And he left with the satisfaction of having accomplished that goal.

On a personal and social level I knew Kayyam well during his growth in learning, in character, and in depth of understanding. He seeks truth in each and every area of his life, whether in learning, discussing, or relating to his fellow students and his teachers... As a student, Kayyam was outstanding. As a young practicing doctor, I got the impression that he will be talented in clinical medicine as in his work he was consistent, active, energetic, dedicated and passionate, enthusiastic, cheerful, and a pleasure to work with.

I highly recommend Kayyam for any position of work, leadership, education, or any other capacity in which he can spread his excitement and share his talents with others.

I and many of his teachers at our institution are expecting big things from him in the way of educational and communal leadership in the years to come. And knowing Kayyam, he will not disappoint, and probably will exceed our expectations.

Sincerely Yours,

Gamal Moustafa MD
