AYON. REVER SANS: M. VAN BUREN. POR VICE PRESIDENT RICHARD M. JOHNSON.

80 We are requested to state that the meeting which had been previously called at the Mariguy Hotel, for the relief of the unfortunateaufferers by the late fire at Miller's saw mill, has been postponed to this evening at 7 o'clock, at Hewlett's Exchange. We hope every good charitable citizen will attend.

Laysarou. Pacarra.—At an adjourned public meeting held yesterday at the Morchants' Exchange, Mr Esmond J Fosswall was called to the chair, and Messes Ballitt and Hall appointed set the previous meeting, presented the following report by their chairman, Mr

imorau, Cuculu, Lapayre & ee

The committee appointed at a meeting held at the Exchange in Royal street on the 10th instant, to take into consideration the establishment of a line of packet ships between this port and the two principal com-mercial ports in Europe, Liverpool and Havre, beg

leave to report—

That in common with their follow eitizens generally, they are fully impressed with the importance of a more expeditious and regular intercourse between those places, and are canvinoed that the time has now arrived when it behoves this community to move in a project from which such important results may be anticipated.

We have a lower resulted the reade naturally billenger. rrom which such important results may be anticipated. We have too long permitted the trade naturally billionging to New Orleans, as the emporium of the Mississippi valley, to be diverted from it, when it is evidently in our power, by a little exertion and liberality on the part of those most deeply interested in the acheme, to remove the tribute we have so long paid to our more interpretable and these of Mar. Val.

quent loss, sestained by them for want of regular. Issue of ships, especially between this and Liverpool, by which they could with some certainty calculate upon receiving their goods. To them the project is therefers of deep interest, nor is it less so to the property holder, although the advantages are not so especient at a giance. The increased business of the place would necessarily substace remts, and with them the value of

with ease, accidents excepted, the semi-monthly voy-age to either port. Not less than ten ships for each age to either port. Prof. ices than the many are con-port, (etcam ships being disapproved of at present, in consequence of not being so well adapted for freight of cotton or tobecoo,) of the first class, carrying not under 1909 being and drawing and over 14 feet of we-ter when votton leaded, are recommended by the com-

ter when estion leaded, are recommended by the committee to be built for the purpose, under the meet experienced commanders, of which, there is no doubt, a sufficient number can be obtained, from among the intelligent and capable captains who are attached to the New Orleans trade.

The committee therefore recommend that subscription lists be opened immediately; and confided to such persons as the President of the adjourned meeting may designate; and that additional lists be deposited in the several Insurance offices; that a committee be memed to prepare a memorial to be laid before the sext Legislature, praying for an act of incorporation with Legislature, praying for an act of incorporation with one million dollare sepital, and permission to increase it to two millions, for the above object, and for other purpodes connected therewith

THOS. BARRETT,

Chairman.
On musica of Mr S W Cakey, the report was unanimously adopted; and ordered to be published.
The chairman them appointed other gentlemes to assist the formerly appointed committee—whose names shall be given in our next.

We have been informed that the Louisia been captured by the Texten vessel Invincible:—yet of course that cargo was not American property; and he insurance should not have been paid!!

Captain Kan, our worthy postmaster, has resolved in future to open the office every Sunday morning from 8 till 10, instead of from 10 till 13. This he is anabled to public.

The following resolution was adopted by the council of the third municipality:
Whereas the engines belonging to Mr. P. Sould's foundry and to the Louisiana Sugar Refinery, as well as the different fire companies and a great many of our fellow citizens have andered signal services at

the late fire;
Residved that the thanks of this municipality are hereby offered to the Fire & Hook Compenies, and also to our fellow citizens for their seel and the energial services they have rendered the unfortunate suffer-

ers by this great calamity.

The council of the central municipality stem in carriest, if we may judge of their fature conduct by their transactions on Tuccday last. All the appointment of officers were made; but not the least valuable of them were those of civil engineer, a surveyor and an assistant—to presente and complete the works of improvements required for the port and the streets. The instructions given to the surincer to resent all and an assistant—to presente and complete the works of improvements required for the port and the streets. The instructions given to the engineer to report all the projects designed said required for the imprevement of the port thro the whole axion of the parish on both sides of the river, are useful, altho not indispensable; but the orders made for regulating the steering of alone and beats are as essential as useful. The specieus extent given to steemboots indicates that our aldermen are fully aware of the value to their mannicipality of the insernal trade carried on by them from the Mississippi and its tributary streems; and they may probably be induced to concede the space between St. Louis and Toulouse streets, to the regular packets belonging to the improvement and banking company, and to these to the Bayon flura packet company.

We sikil cheerfully announce to the public all the benefits likely to result from the action of the outstral council; and promote their objects as far as our hiffurence and the circulation of the See extends best being now equal if not superior to that of any other paper in

ence and the circulation of the See extend: best being now equal if not superior to that of any other paper. New Gricans. Mutual assistance is however necessary or model to the present instance, as in most others in public or active life; and we trust that the aldermen in their sention this evening, will generously remember this maxim of prudential policy.

Mixxoo and Tixxas—Many of our citizens who fancy their segecity can be better displayed by skepticism than credelity, still hesitate to baliave in the capture of Senta Anna; and therefore credit every rumor to which their 'wish is father to the thought.'

to which their 'wish is father to the thought.'

The arrival below yesterday of the brig Henry from Matamorae produced additional rumors. They ever that when it left on the let inst, despatches had been received from Santa Arms, dated San Antonio de Behar, April Sist—the day on which the action at Lynchburg occurred; and therefore infer that he cotifd not have been in the action. They udd also that it was Sesma's division of the Moxican army stationed at San Felipe, which Heuston defeated; also that there had been a revolution in Mexico; and that the Camanches Indians had made irruptions along the Rio Grande, so as to intercept all communication with the Maxican Indians had made irruptions along the Rio Grande, so as to intercept all communication with the Maxican states and Texas; had defeated a foraging party of the Mexican army; and plundered all their provisions. Now let us oppose facts to these rumors. We reserved three days since journals from the city of Maxico of the 27th ult, when all was ejalet; and in which it was stated that Santa Aana had left San Antonic early in April to proceed sawards the north of Texas, and then concentrate his forces on Harrisburg and Galveston, in conjunction with those under Secura, waiting orders at San Felippe; and we heard afterwards that he actually did so—that he passed the Brasoa, and descended the San Jacinte, when the innustations of the rivers hemmed him in and prevented succor from Seems; for Santa Anna was induced usless coleur to fight.

Again, several days past, a vessel arrived trom Maximuscan, whence she left 4 or 5 days later than the Henry which left on the latinst; and brought decided confirmation of the capture of Santa Anna.

over the treasury accounts of the cor poristion he might be still more astonished to find that nearly \$5,000,000

mon road passing several stream dets, that the road should pass thro not over them? or that the courses of the rvers about be pensally mantities on the road inWho then would adopt the system; of allowing the intersections of the streets to be firmed as at presenso that the level of the streets is perpetually destroyset; the stones broken and unbedd ed; the waters perturb to the streets and all meticals residuals.

gers?
Yet this system has been obstint sely pursued in New Orleans without the slighest attention heing paid to the nature and quality of the marshy soil; or lawing any dea of the proper mode of promoting the free irrigation in the extrects. Draining has not been thought of in lawing out one street; or constitution and gation in the etreets. Draining has not been thought of in laying out any street; or constructing any house—which is also a radical evil, es sentially injurious to to the sainbrity of the city, the health of its inhabitants and the comfort and durability of their houses. Hence there is searcely an old house in the city built on the ground, that any person can inhab it with safety to himself: articles of apparel being it id by for the day become masty and offensive: and this because draining the city had not been uniformly at lepted when laying it out.

the city had not been uniformly at lepted when laying it ext.

But many of the evils which or eruse the produce a degree of insalability in New Orles de agies from the present injurious system of paving. Every inhabitant of a year must be aware of this: for he must have seen the streets literally become must during wat weather; and palpable dust in dry.

We have hitherto indicated the ressedy. All the streets reservant of Bourbon should she prepared for paving, by proper layers of wood so und or square being perpendicularly imposed—of a sufficient depth to elease the bell for paving. This system was adopted with the happiest success in Loss lon and other Birropean cities—where the soil was as low as in New Orleans; and formerly as subject to overflowings from pean cities—where the son was as low as in New Or-leans; and formerly as subject to overflowings from rain, or inundations by the adjoining revers.

We have witnessed the benefic isl-results of this plan; and believe it to be the cheaps at that could be a-

depted here, as well as the best. Assumed been and surfaces should invariably be prepared for all streets and if they are not so by nature, they should be rendered so by art. Has this been done in New Orleans.—Have any of the corporation surveyors or contractors ever thought of regarding the quality of the soil; or

not present an elevated sandy bottom, art prepared a substitute. This is the secret of the comfortable and permanent nature of Mobile streets and adjoining

New Orisans 'lesing lower than the river has an advantage in its disadvantages—its strests may be thoroughly irrigated by opening a connection with the river; and allowing free vent to its waters towards the awarip. Now can this be well done by the present system of paving? Should not regular channels by gutters formed of stone work he adopted in the paved streets, as the channels are of wood work in the unpaved? Should not bridglets of stone be formed in the newed wars, as nothing the second and in the case. red—a free irrigation of them be promoted—and all the injuries resulting from the present system be pre-

the second least there recombined against the second secon

the ports of Brazil, and the revenue annually received from the duties on foreign goods, amount to about 45.000,000.

The productions of this country are various, and of great value. They consist of sugar, coffee, rice, tobacco, costion, hides, dye-woods, and inedicines, with insisted quantities indigo, gold dust, and rough diamonds. In 1834 there were exported from Bahta, (the second city of Brazil.) 47,423 lerge cases, 470 bags, and 3000 barrels of sugar; 40,330 bales of cotton; 148, 752 dry hides; 12,600 bags of ceffee; and \$23,500 horas, without including dye-woods, tobacco, coops, tec. This will give some idea of the productions and vast reserves of Brazil.

The inhabitants too, under their present liberal form of government, are becoming more subjected—and suppy to an extent unknown in many of the countries of Europo, the blessings of estril, religious, and commercial liberty. Law and medical success are already established in some of the principal site, and the subject of the productions are excellent public mesoum, public library, botanic grach, dec. The public flebot Brazil, which in 1855 amounted to unwards of 40,000,000 of dollars, is now, not withstanding the mismanegement of Don Pedro, and the revolution of 1831, reduced nearly two-thirds of, and is in a fair way of being leguidased.

The acts of sale to be passed before Carille Pollock, see pab, at the expense of the purchaster.

THILL be sold by Jehn M. Buch, at Banks Arcade, on Tuesday the 24th May, 1836, at B o'clock, without reserve, to close a concern.

THIRTY BUILDING LOTS, aimstad on Camp atreet, as per plan draws by B. Baisenstad on Camp atreet, and a plan draws by B. Baisenstad on Camp atreet, and a plan draws by B. Baisenstad on Camp atreet, and a plan draws by B. Baisenstad on Camp atreet, and a plan draws by B. Baisenstad on Camp atreet, and a plan draws by B. Baisenstad on Camp atreet, and a plan draws by B. Baisenstad on Camp atreet, and a plan draws by B. Baisenstad on Camp atreet, and a plan draws by B. Baisenstad on C o'cleek, without reserve, to close a concern, THIRTY BUILDING LOTTS, aimsied on Camp street, as per plan drawn by B. Buissing, Eag, surveyor, and new deposited at Banks Arcing.

The great improvents already made, or contemplated, on Learney street, and the proximity of the Lacoume, Lefagette and Carrolton rail tracks, render those lots weighly of the attention of speculators: they are the eligible phaces for dwelling bouses for business men, and they have, by the rail roads, the gregorst facilities for transportation in any direction. Camp street being now open through the Nus-Fashourg, it is the shortest road between New Orleage and the fast improving city of Lafayette.

Terms. 1-4 at 6 months, and th balance at 1, 2 and 3 years, for approved andorsed notes, with special mortgage. Acts of sale before Theodore Seghens, neary public, at the exposus of the parchasers. mill by JOHN M. BACH.
