Edit Bay Moves To New Location

With a need to better serve his growing clientele, Skip Konte, the owner and founder of The Edit Bay, a full-service post production company, has moved his operation two blocks away from his former location to 571 Poplar Street in Orange.

In addition to this move, music composer Michael Licari, with credits for scoring the popular daytime show "Guiding Light" as well as commercials and corporate videos, has opened shop at the new facility. Licari's full complement of hardware, software and composing and audio sweetening capabilities are a welcome asset to The Edit Bay, according to Konte. The facility has networked Licari's studio with the rest of the studio's NT-based systems.

Waterland Adds Post and Stage

Citing a growing need in Orange County for fully equipped sound stages and post production resources, the people at Waterland Productions in Irvine have recently added a new non-linear edit bay to a long list of other production amenities.

The 4,000 square foot facility has added a new Avid Media Composer 4000 with digital Betacam and Beta SP source capabilities. In addition to the company's 3D-animation workstation, the facility offers a 2,000 square foot sound stage that includes a large seamless cyc, lighting grid and a sizeable green screen for Ultimatte work.

For added convenience, a voice over room is also available.

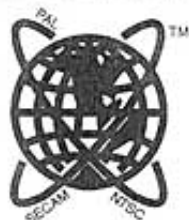

Waterland Studios

Waterland Productions is actually known for its producing prowess in the area of national commercials, documentaries, corporate/industrials, and television shows. Over the years, Waterland's President Robert Barry Ptolemy and Vice

President Dean Hamilton have produced and directed over 80 commercials and other programs. So it's no wonder the company took on so much equipment. "After we ended up with so
