[[HACKATHON | MUMBAI | मुंबई]]

November 19 and 20
2011

At the India Hackathon 2011, help us improve access to Wikipedia and Wikimedia's other projects across all languages, via mobile devices, and for people without Internet access!

Hackers of all backgrounds are welcome and prior experience with the MediaWiki software is not required. Translators with a linguistic background who can help improve language support for Wikimedia technology projects are also welcome. This coding event will happen concurrently with the WikiConference India 2011, and near its venue. About 100 to 150 participants are expected.
