#### Media Metrix 2.0 Legend

[P]	Property
[M]	Media Title
[C]	Channel
[S]	Subchannel
[G]	Group
[SG]	Subgroup
[E]	Custom Entity
[N]	Ad Network
[A#]	Alternate Rollup
[X1]	Extended Network

(hybrid) Used to identify properties that are measured, either in whole or in part, using both panel and census based methodologies.

\* Indicates that the entity has assigned traffic to certain pages in the domain to other entities

\*\* Indicates that the entity is an advertising network.

... Indicates data used fell below minimum reporting standards and/or data not available.

Indicates data is not available in the data set for reporting for the specified time period.

# Caution - small base may result in unstable projection.

## Directional purposes only - base too unstable for reliable projection.

Details on minimum reporting standards are located at: [http://mymetrix.comscore.com/mmx/definitions\\_minreportingstandards.asp](http://mymetrix.comscore.com/mmx/definitions_minreportingstandards.asp)
