

# OpenStreetMap integration into Wikimedia projects

A progress report on getting OpenStreetMap  
integrated into Wikimedia projects

Ævar Arnfjörð Bjarmason

Wikimania 2009  
August 26-28, 2009  
Buenos Aires

# Who am I?

- A (inactive) MediaWiki developer
- A Wikipedia and OpenStreetMap contributor
- Someone who wants to increase collaboration between these projects

# What is OpenStreetMap?

# What is OpenStreetMap?

- A “free wiki world map”
- For maps what Wikipedia is for encyclopedias
- Freely licensed
- Community contributed

There's a lot of similarities  
between OSM and Wikipedia

# OpenStreetMap has community

- OSM has a thriving global community
- You can join it!

# OpenStreetMap has conferences

# OpenStreetMap has meetups

 [www.gfoss.it](http://www.gfoss.it)  [gfoss.it](http://gfoss.it)

**OpenStreetMap**  
stiamo realizzando...  
**.la mappa libera del mondo**  
[openstreetmap.it](http://openstreetmap.it)

# Active contributors

Wikipedia

OpenStreetMap

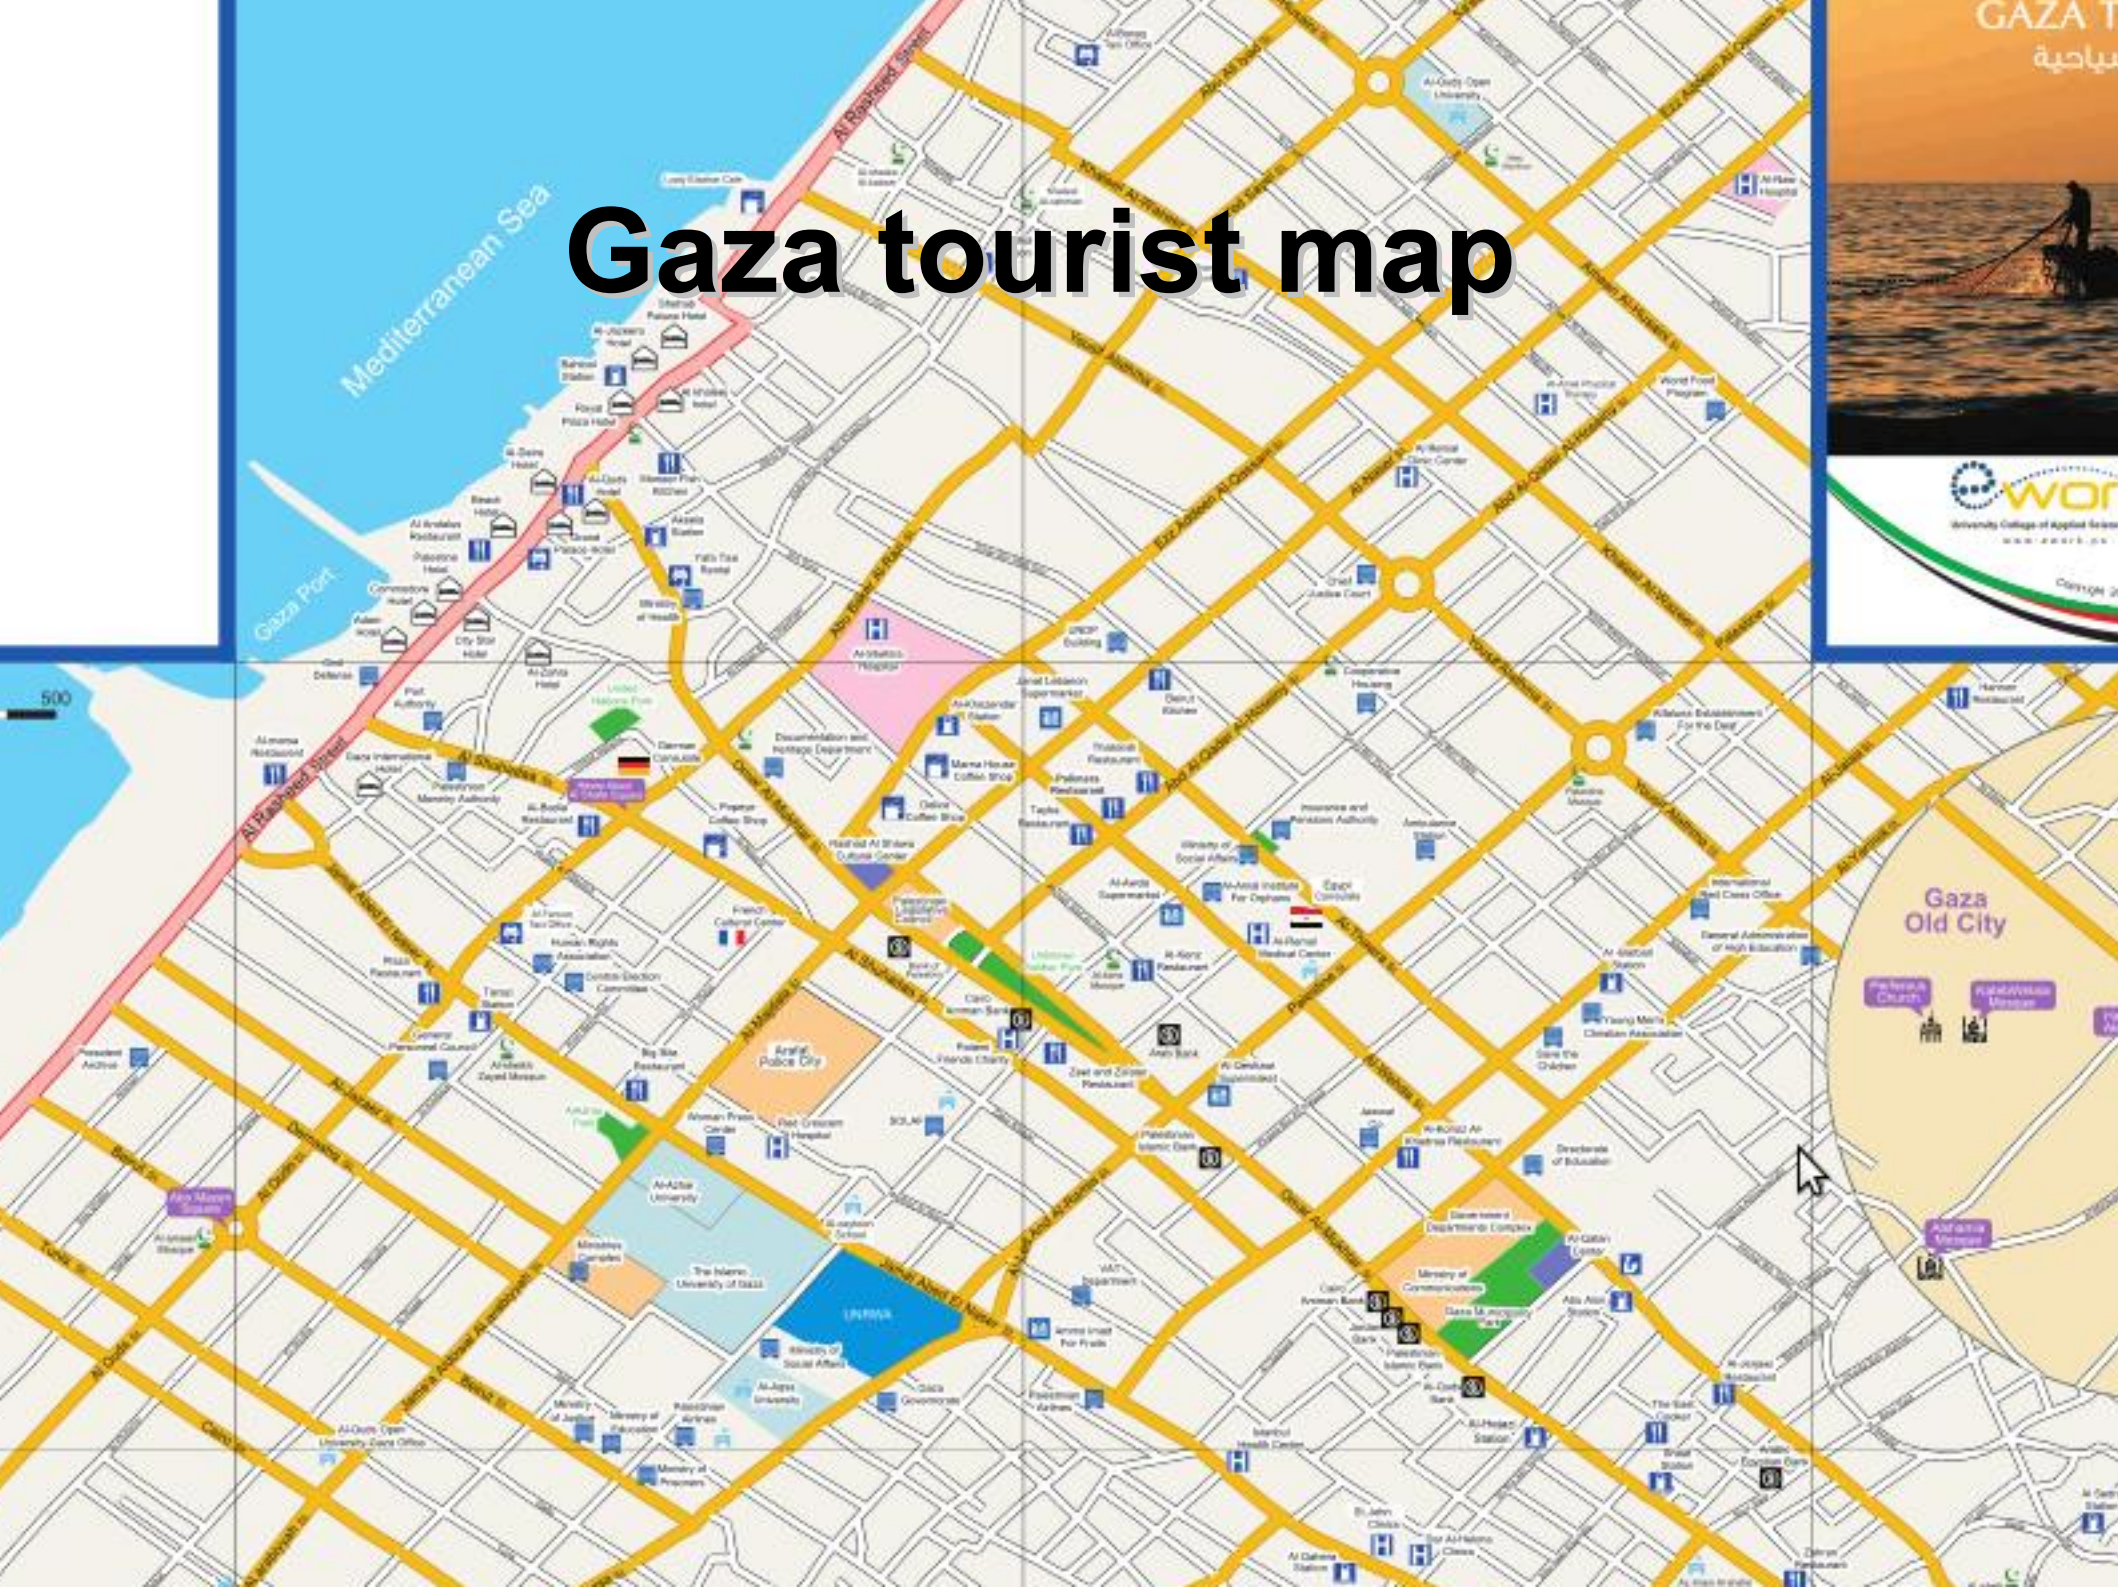

But most importantly...

# OpenStreetMap has vector data

Which gives us all sorts of neat stuff

# Gaza tourist map

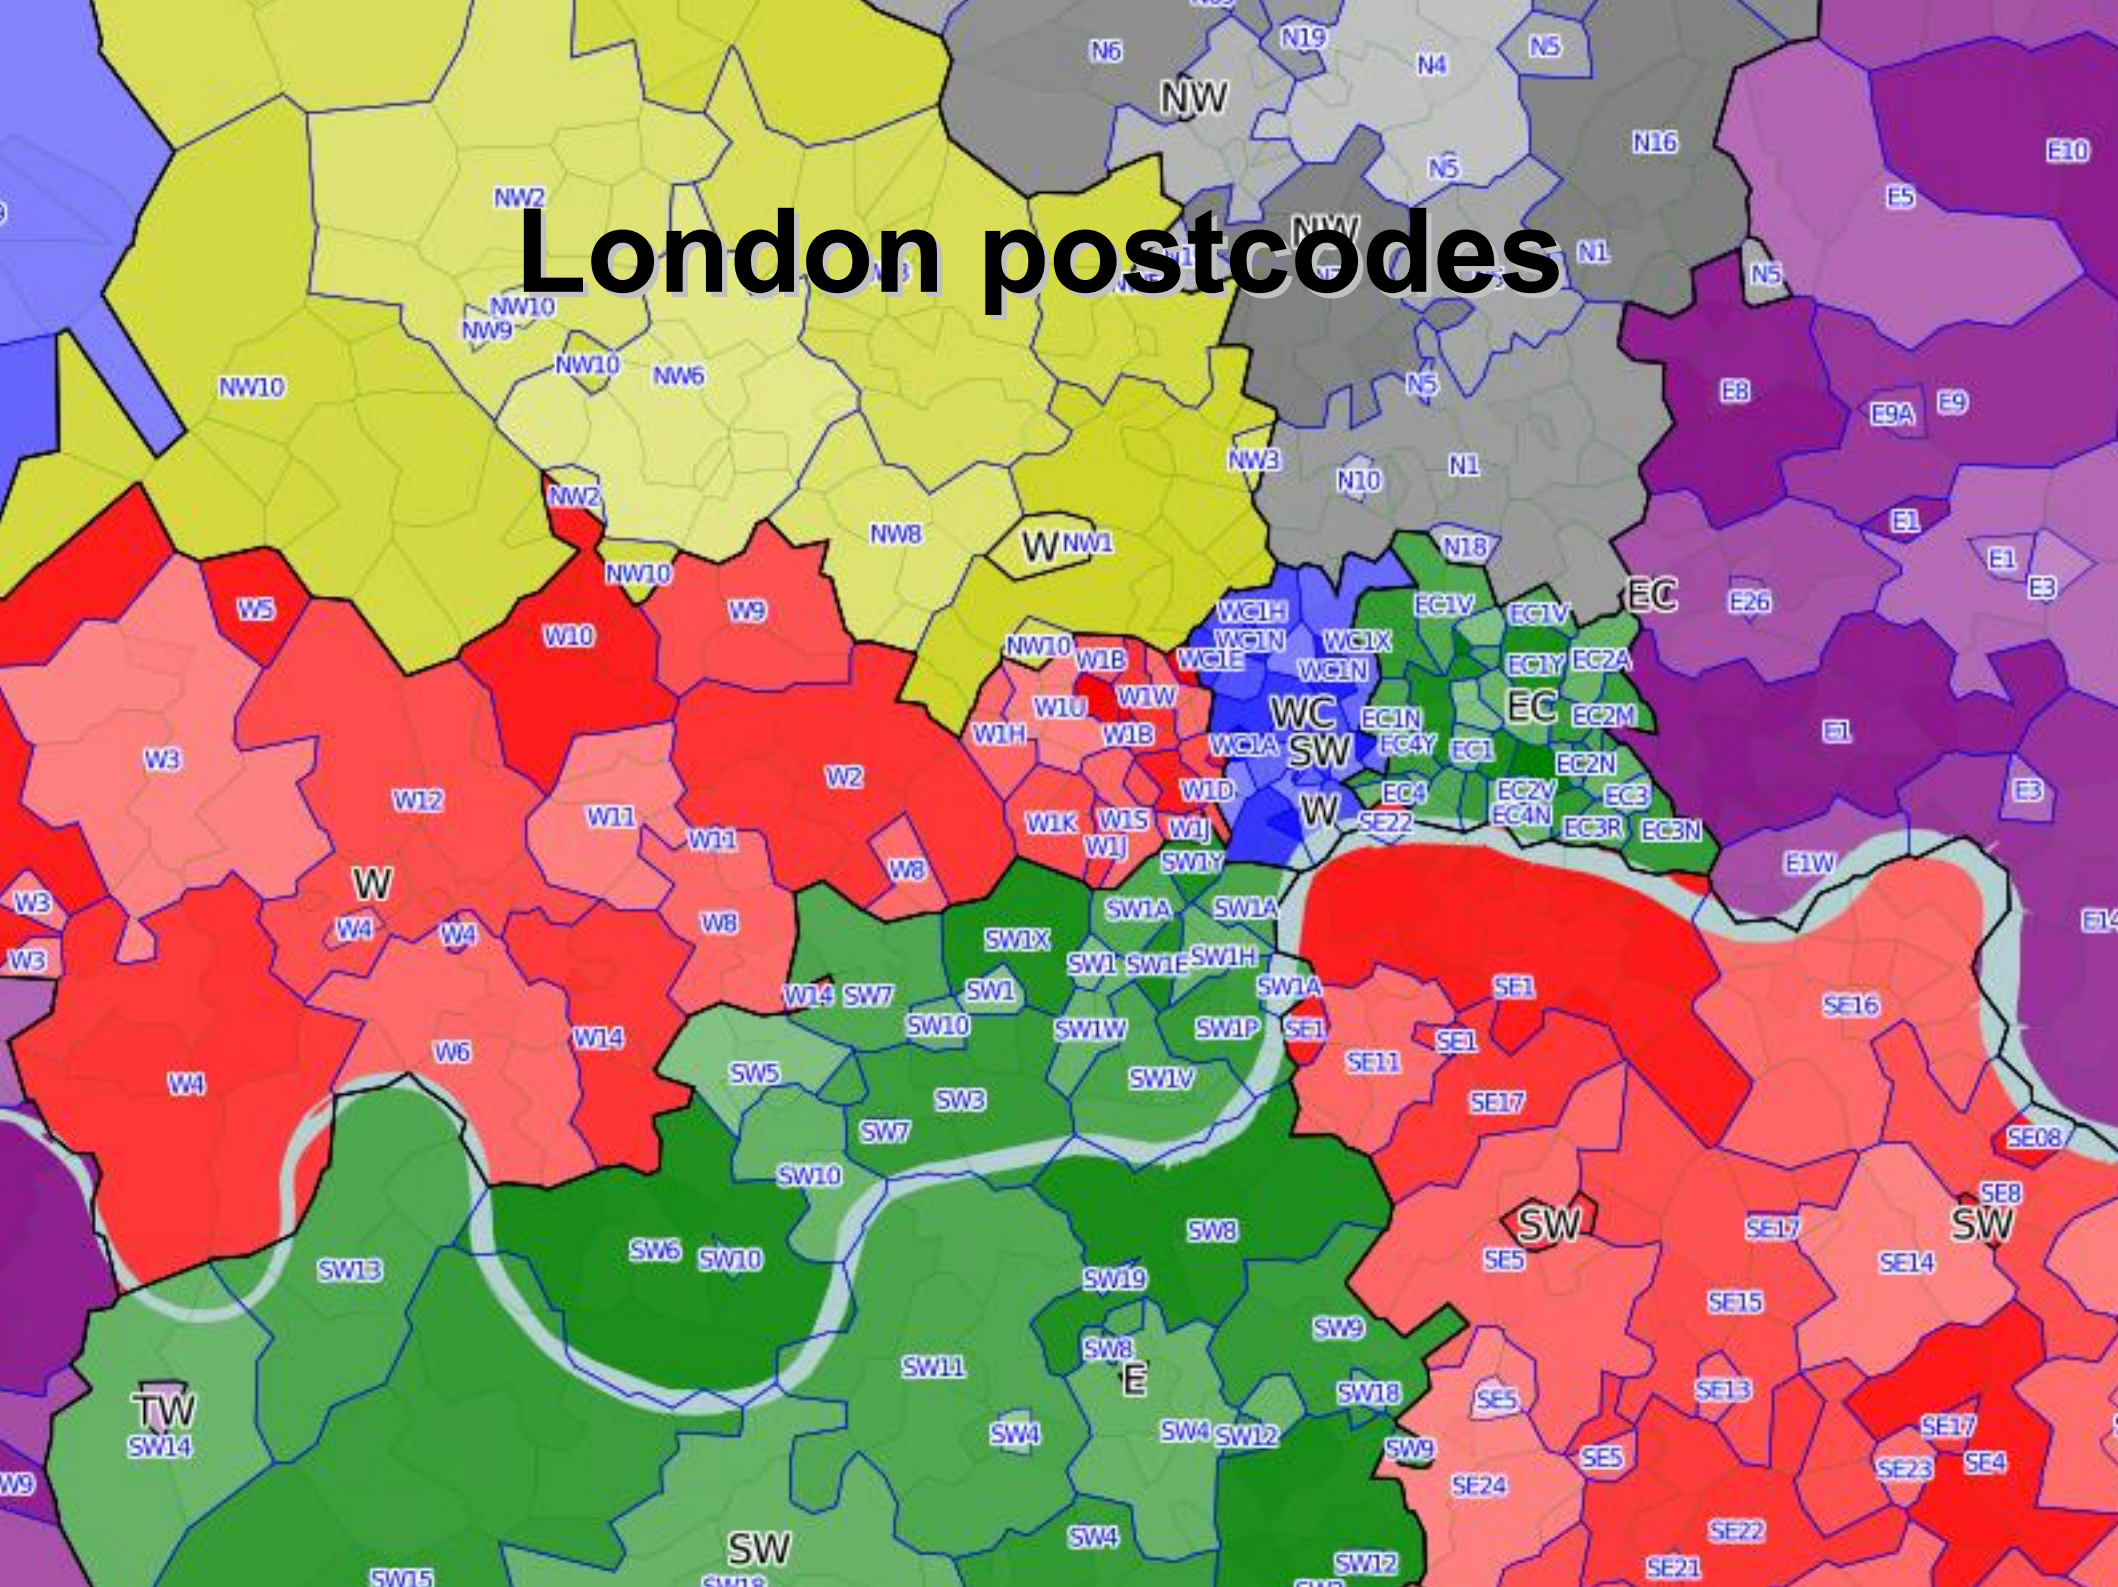

Gaza Old City

# Tactile maps for the blind

# London postcodes

# Why not use Google Maps?

...or some other big proprietary map?

- It doesn't have any of those things:
  - A free license
  - Community
  - Vector data

**So let's do it!**

# Developer meet-up 2009

- Held in Berlin by Wikimedia Germany
- A bunch of people interested in OSM ↔ WM integration were there
- Plans were made on how to accomplish this

# “OpenStreetMap maps will be added to Wikimedia projects”

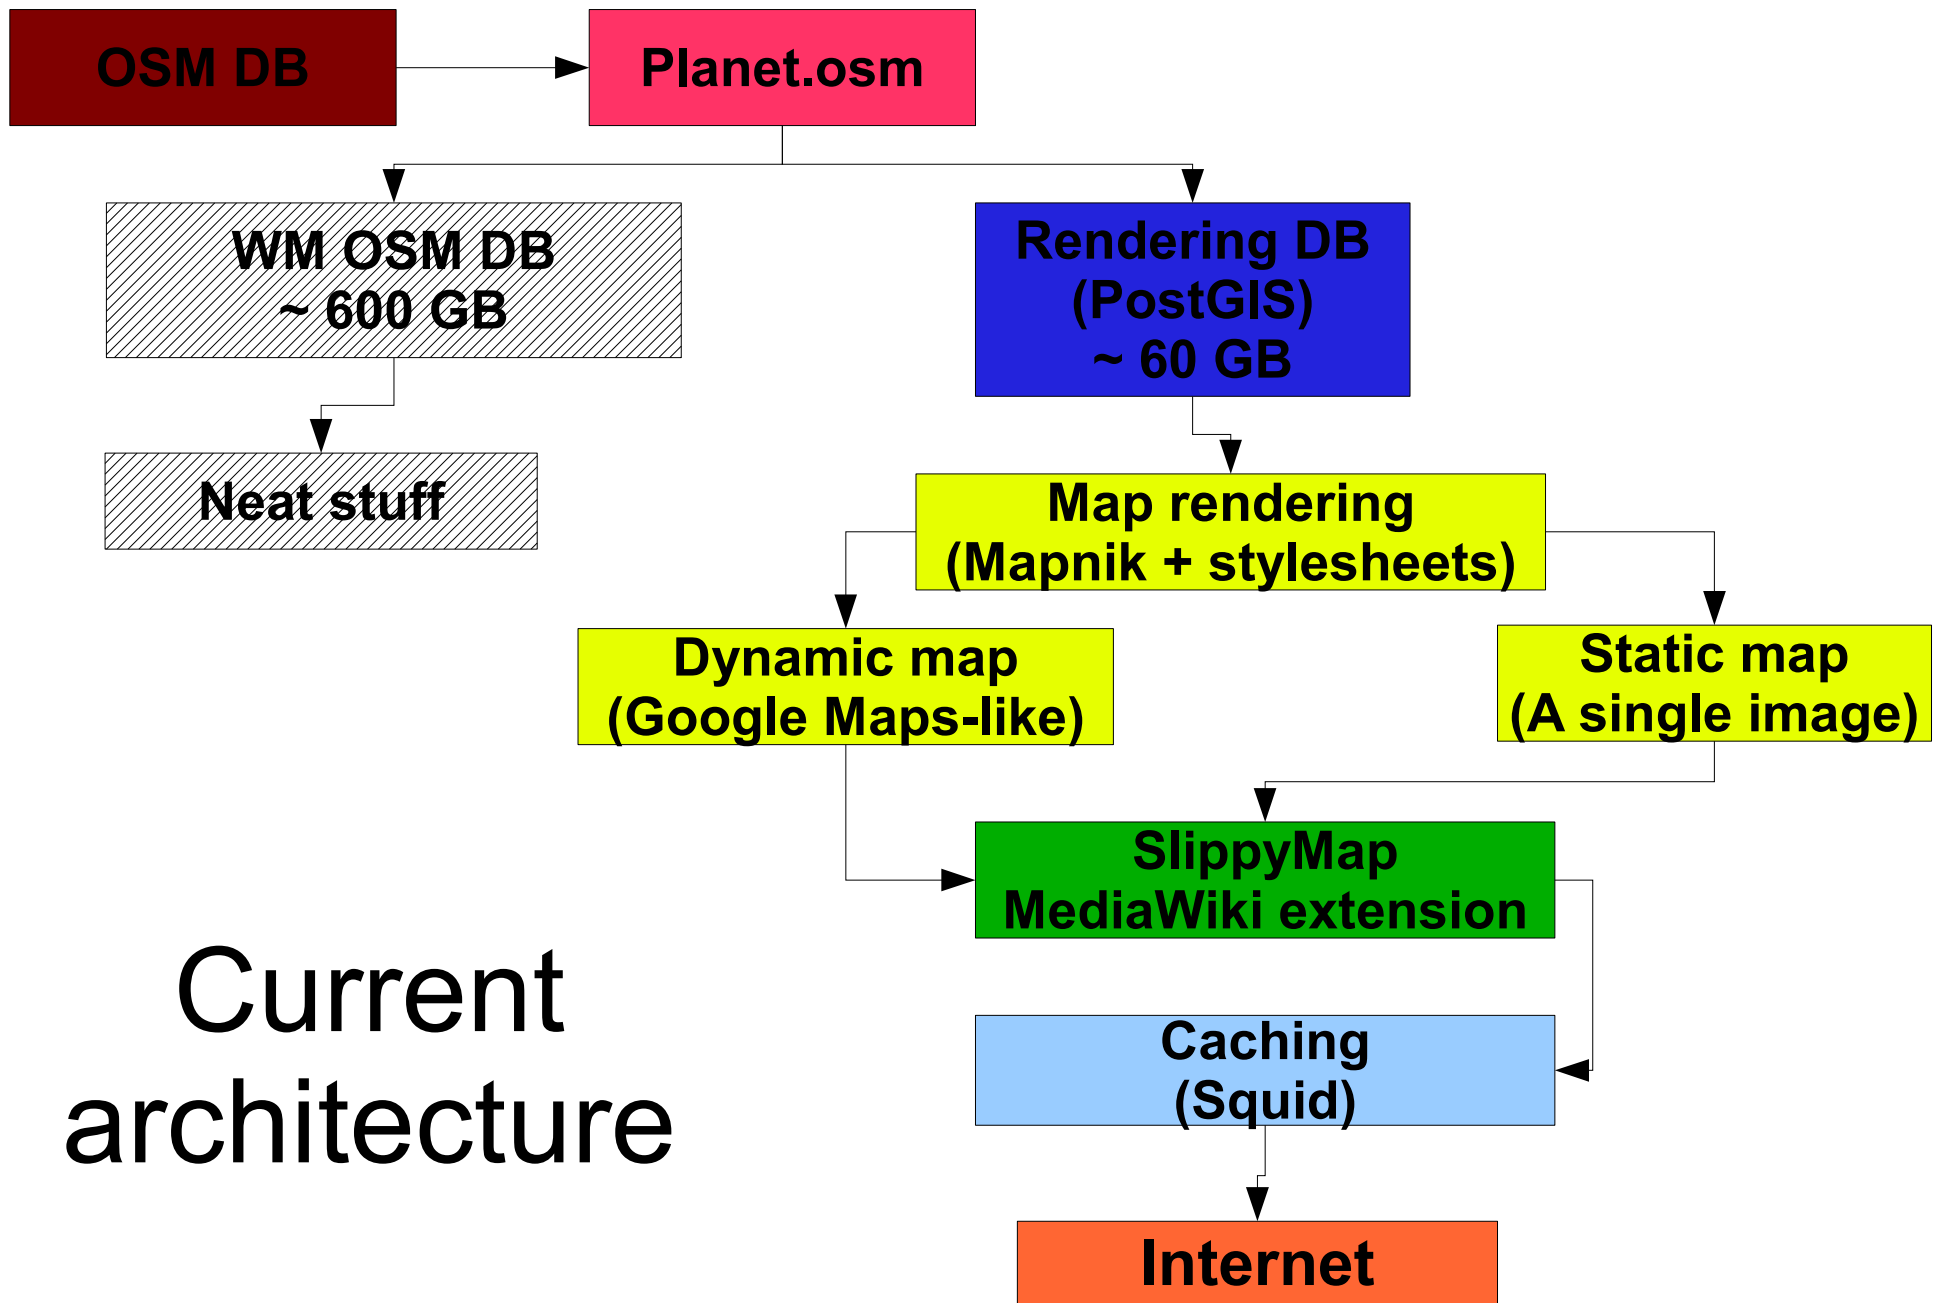

- Wikimedia will set up a database to mirror the OSM data (Planet.osm)
- Wikimedia will set up its own rendering infrastructure for rendering tiles & other maps from the OSM data
- The existing MediaWiki extensions for displaying OSM data in a MediaWiki article will be improved to work acceptably in production on Wikimedia servers

# Design goals

- The maps should also work for non-JavaScript enabled browsers
- The tools have to be stable & deployable on Wikimedia servers
- Everything we're generating has to be cachable so we can throw it at the squids

We've done that...

And this is what we have **now**

Current  
architecture

# The (rendering) database

- A PostGIS database with a limited OSM dataset used for rendering
- Around 60 GB
- We'll set up a full OSM database later

# Map rendering

- Rendered using mapnik
- Currently using the OpenStreetMap stylesheet
- Rendered in all 279 Wikipedia languages
- We'd like to do more rendering variations

# Multilingual rendering

- Done by looking at the local name of objects
- Not nearly all objects have translations
- The OpenStreetMap database needs a big i18n effort

## **Tags on the Brussels node:**

- place = city
- capital = yes
- name:fr = Bruxelles
- name:nl = Brussel

# Bruxelles & Brussel

# The Extension

- Called “SlippyMap”
- Really basic
- An improved version of the extension that was used on the OSM wiki
- You can use it with a `<slippymap>` tag:

```
<slippymap  
  lat = 64  
  lon = -21  
  zoom = 12  
  width = 400  
  height = 300  
  mode = osm />
```

# The Extension / Dynamic / Static

# What comes next?

- Getting what we have ready for production
  - Fixing bugs
  - Testing the stack under load
  - Rolling it out on some wiki (German?) for testing
  - Global deployment
  - Adding more exciting features

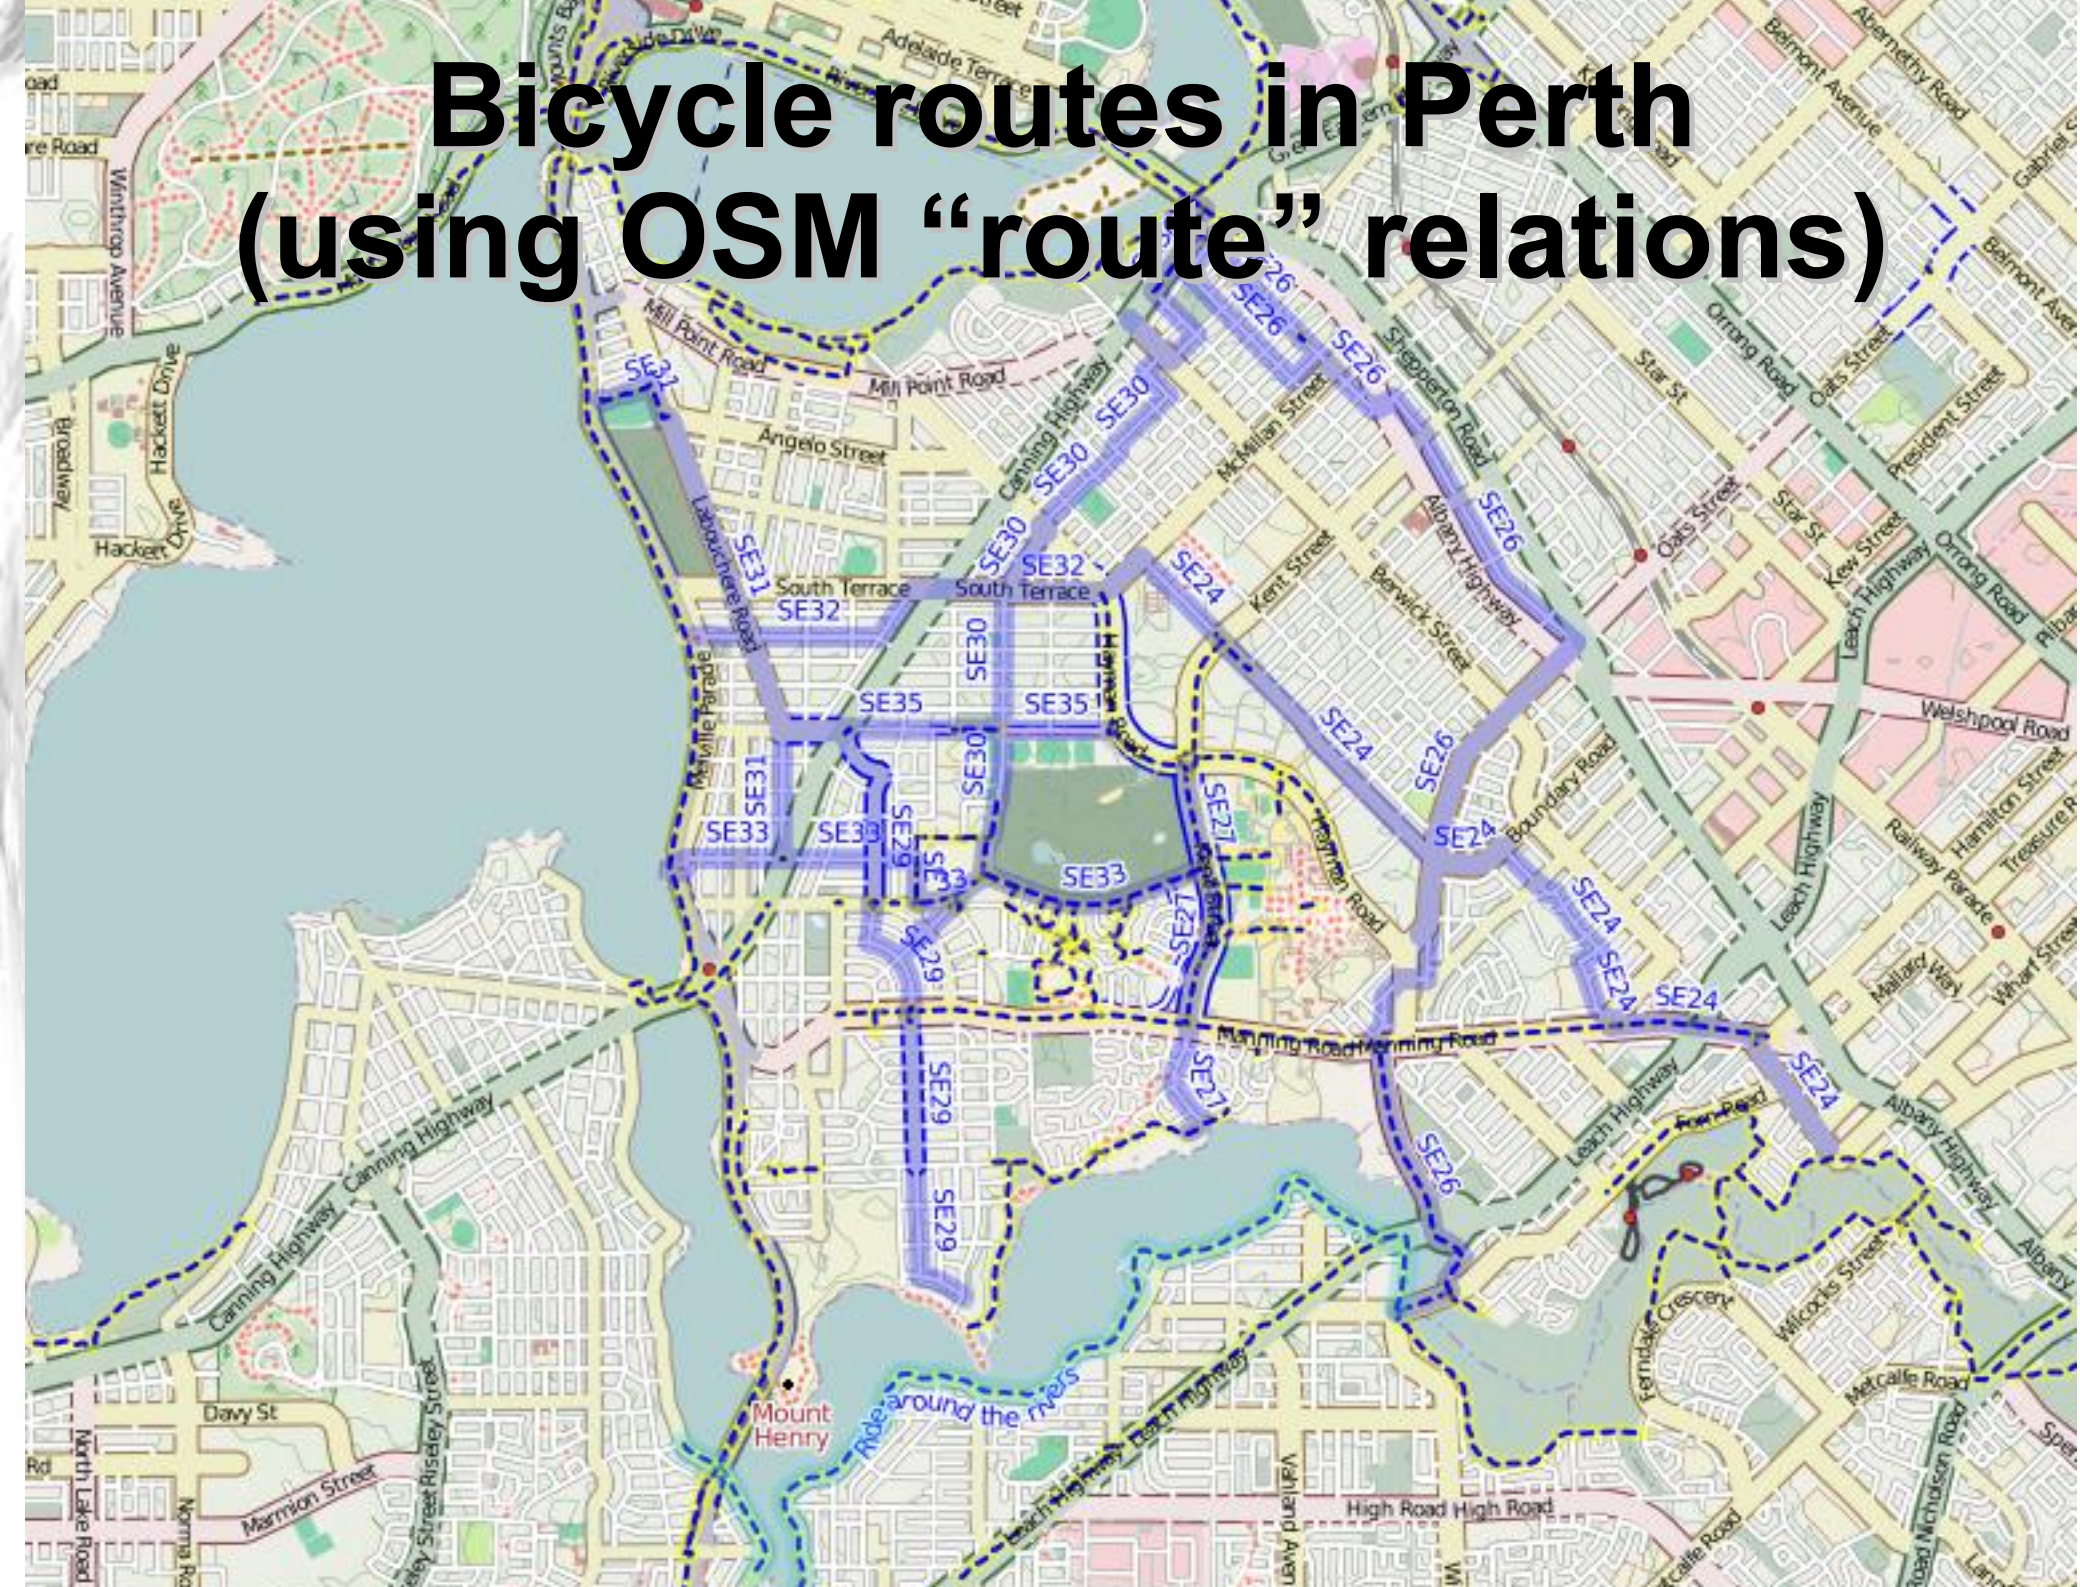

# Want to help?

- Finding out what needs doing:
  - A **maps-l** mailing list on [lists.wikimedia.org](http://lists.wikimedia.org)
  - The **Maps** component in MediaZilla
- Programming to be done in C/C++/Python/JavaScript/PHP
- UI testing: <http://xrl.us/osmwm>
- Other interesting projects

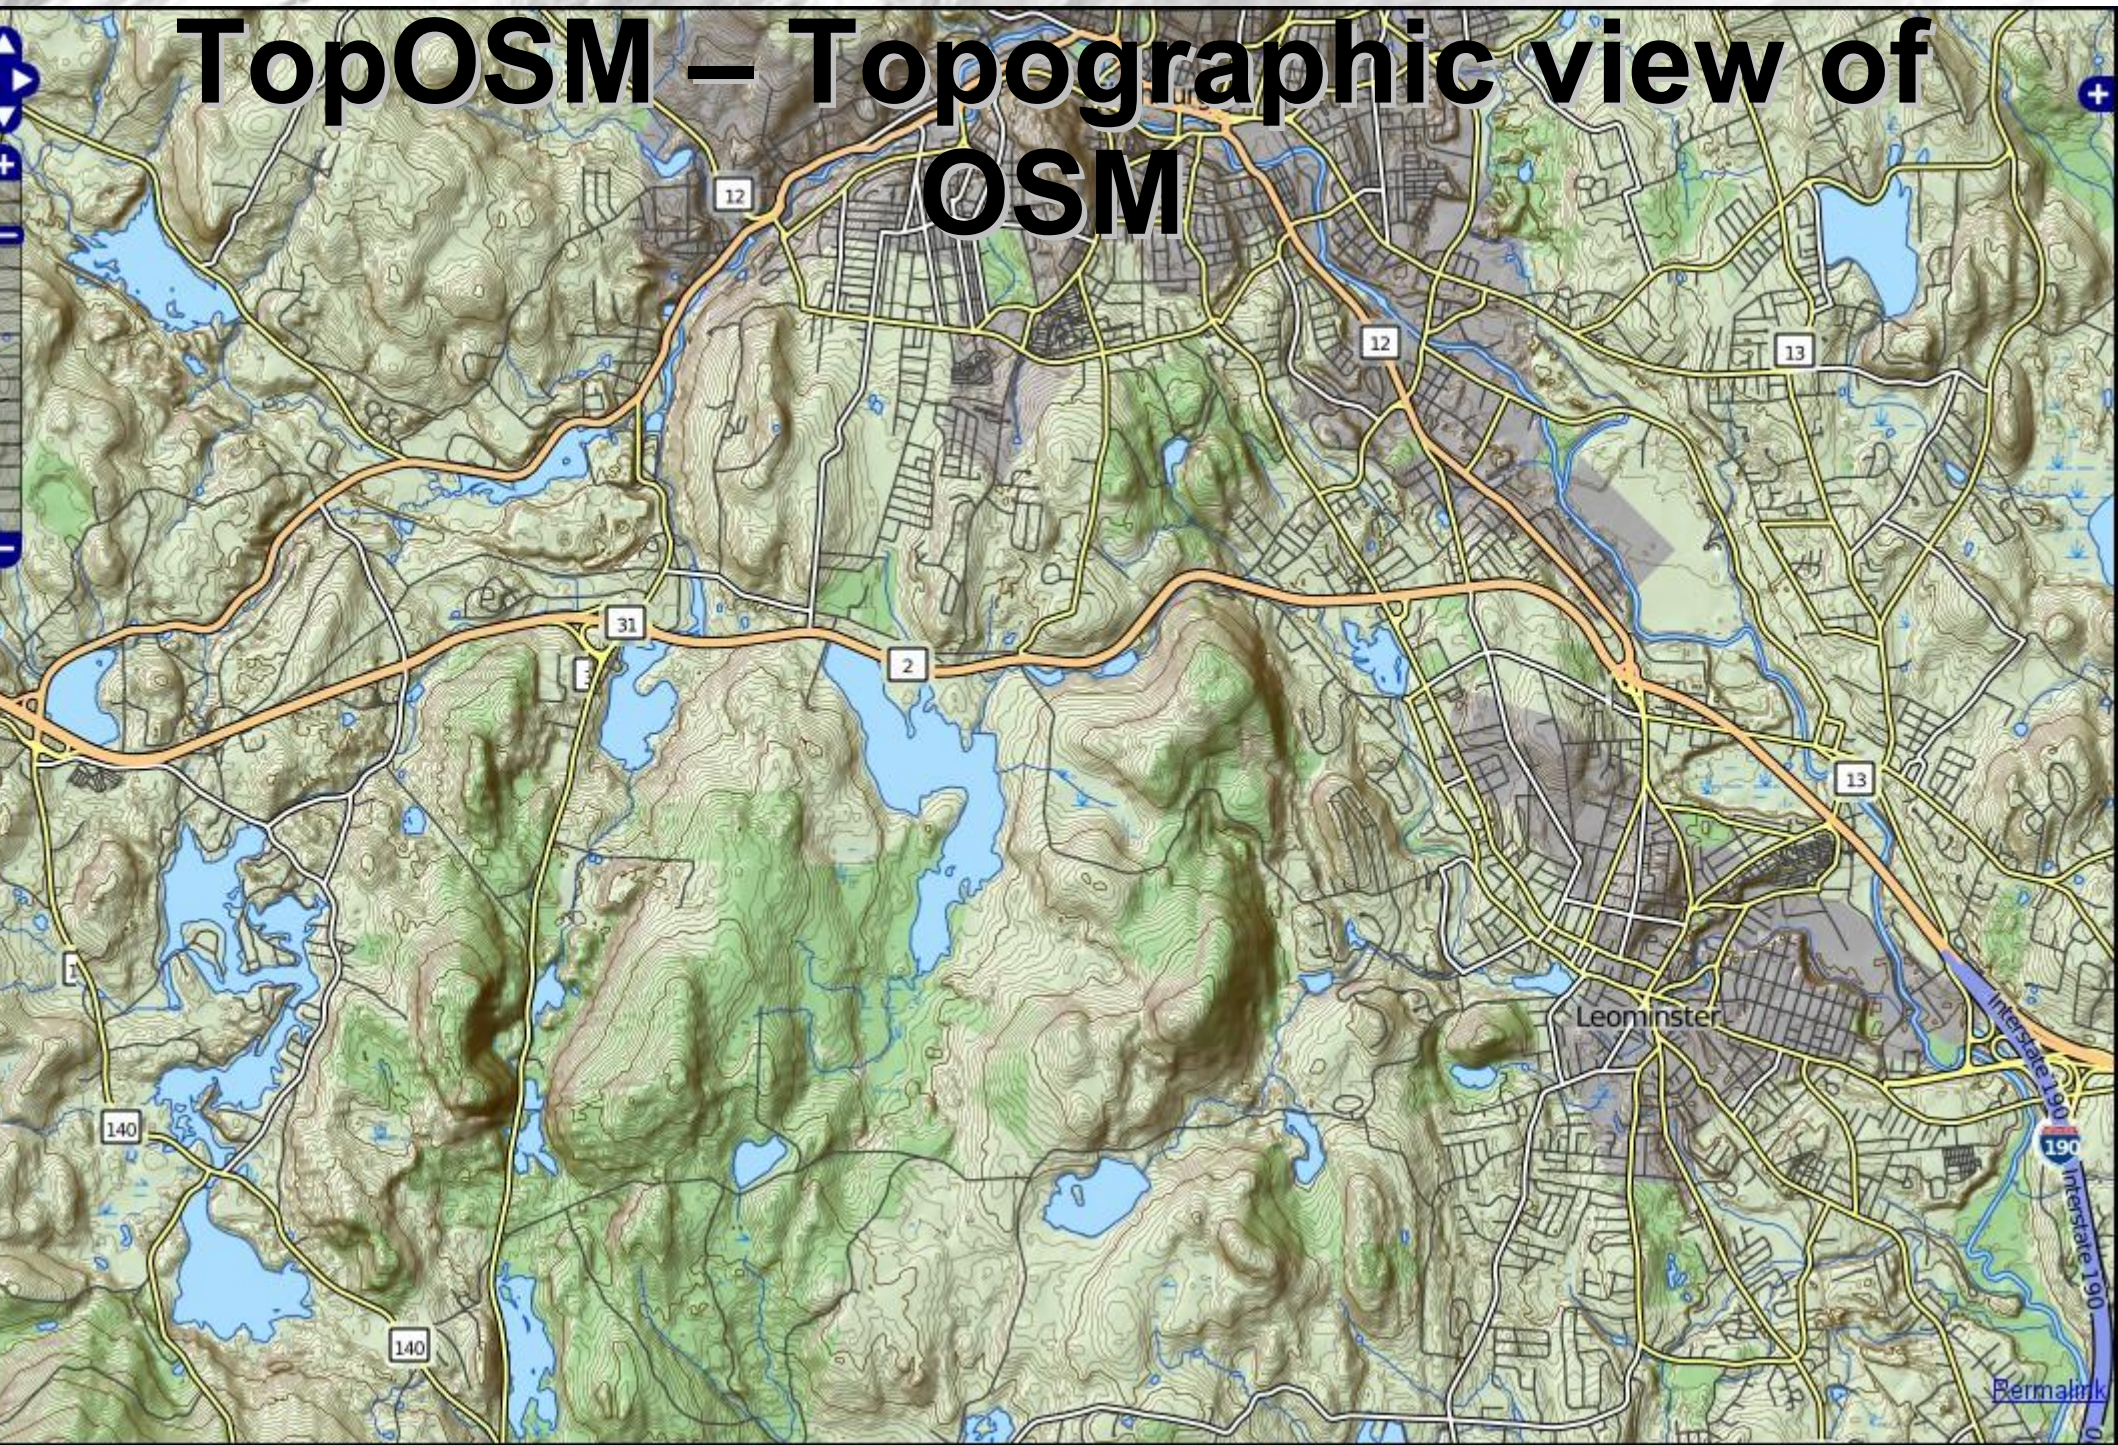

Neat stuff we can (hopefully) do in the future...

# Bicycle routes in Perth (using OSM "route" relations)

# TopOSM – Topographic view of OSM

# Coolserver tools

## Multilingual Country-List

<a href="#">Ebon</a>	7 / 235 (2.98 %)	<a href="#">CSV</a>   <a href="#">CSV (not ok)</a>   <a href="#">GPX</a>   <a href="#">GPX (not ok)</a>
<a href="#">Eesti</a>	214 / 235 (91.06 %)	<a href="#">CSV</a>   <a href="#">CSV (not ok)</a>   <a href="#">GPX</a>   <a href="#">GPX (not ok)</a>
<a href="#">Emiliàn e rumagnòl</a>	4 / 235 (1.70 %)	<a href="#">CSV</a>   <a href="#">CSV (not ok)</a>   <a href="#">GPX</a>   <a href="#">GPX (not ok)</a>
<a href="#">English</a>	230 / 235 (97.87 %)	<a href="#">CSV</a>   <a href="#">CSV (not ok)</a>   <a href="#">GPX</a>   <a href="#">GPX (not ok)</a>
<a href="#">Español</a>	217 / 235 (92.34 %)	<a href="#">CSV</a>   <a href="#">CSV (not ok)</a>   <a href="#">GPX</a>   <a href="#">GPX (not ok)</a>
<a href="#">Esperanto</a>	215 / 235 (91.49 %)	<a href="#">CSV</a>   <a href="#">CSV (not ok)</a>   <a href="#">GPX</a>   <a href="#">GPX (not ok)</a>
<a href="#">Estremeñu</a>	4 / 235 (1.70 %)	<a href="#">CSV</a>   <a href="#">CSV (not ok)</a>   <a href="#">GPX</a>   <a href="#">GPX (not ok)</a>
<a href="#">Euskara</a>	100 / 235 (42.55 %)	<a href="#">CSV</a>   <a href="#">CSV (not ok)</a>   <a href="#">GPX</a>   <a href="#">GPX (not ok)</a>
<a href="#">Eʋegbe</a>	18 / 235 (7.66 %)	<a href="#">CSV</a>   <a href="#">CSV (not ok)</a>   <a href="#">GPX</a>   <a href="#">GPX (not ok)</a>
<a href="#">Fiji Hindi</a>	6 / 235 (2.55 %)	<a href="#">CSV</a>   <a href="#">CSV (not ok)</a>   <a href="#">GPX</a>   <a href="#">GPX (not ok)</a>
<a href="#">Français</a>	217 / 235 (92.34 %)	<a href="#">CSV</a>   <a href="#">CSV (not ok)</a>   <a href="#">GPX</a>   <a href="#">GPX (not ok)</a>
<a href="#">Frysk</a>	207 / 235 (88.09 %)	<a href="#">CSV</a>   <a href="#">CSV (not ok)</a>   <a href="#">GPX</a>   <a href="#">GPX (not ok)</a>
<a href="#">Fulfulde</a>	8 / 235 (3.40 %)	<a href="#">CSV</a>   <a href="#">CSV (not ok)</a>   <a href="#">GPX</a>   <a href="#">GPX (not ok)</a>
