

<b>Action Research 2.0 Project Planning</b>	
<b>Action Plan</b>	
<b>1. Participant:</b> <i>(name)</i>	
<b>2. First Supervisor:</b> <i>(name)</i>	
<b>3. 2nd Supervisor:</b> <i>(if appropriate)</i>	
<b>4. Title:</b> <i>(working title)</i>	
<b>5. Overall aim:</b>	
<b>6. Key words:</b>	
<b>7. Key developmental goals of the project:</b> <i>(3-5 ideally)</i>	
<b>8. Key research questions of the study:</b> <i>(3-5 ideally)</i>	
<b>9. Research methodology and methods:</b> <i>(outline of approach to research and main methods with reference to key literature)</i>	
<b>10. Research ethics:</b> <i>(Include a short statement outlining potential ethical issues that you may face and in particular how you will ensure informed consent, anonymity, confidentiality, beneficence i.e. positive good and non-maleficence i.e. no harm).</i>	
<b>11. Review of relevant literature</b> <i>(~1500 words plus list of references)</i>	

## Feedback on Action Plan

### Criteria for assessment

Participants' work will be judged on evidence of:

- Clarity of research focus
- Description of the context for the enquiry
- Justification for the methodological approach and techniques proposed
- Consideration of the ethical implications
- Overall standard of the action research design

To pass students will:

- Identify a significant and manageable action research focus
- Describe and critically analyse the context for the enquiry with reference to appropriate literature
- Provide appropriate justification for the methodological approach and techniques proposed
- Take account of the ethical issues arising specifically from the design
- Design a proposal of a sufficient standard to provide a sound basis for a worthwhile action research project
