Cauchy-Schwartz Inequality

For all vectors \mathbf{x} and \mathbf{y} of an inner product space

$$|\langle \mathbf{x}, \mathbf{y} \rangle|^2 \leq \langle \mathbf{x}, \mathbf{x} \rangle \cdot \langle \mathbf{y}, \mathbf{y} \rangle$$

$$|\langle \mathbf{x}, \mathbf{y} \rangle| \leq \|\mathbf{x}\| \cdot \|\mathbf{y}\|$$

The equality holds if and only if \mathbf{x} and \mathbf{y} are linearly dependent \Rightarrow maximum

$$\left| \int_a^b x(t) \overline{y(t)} dt \right| \leq \sqrt{\int_a^b x(t) \overline{x(t)} dt} \sqrt{\int_a^b y(t) \overline{y(t)} dt}$$

Inner product is maximum
