Enjoyed Wen-Tzao week?

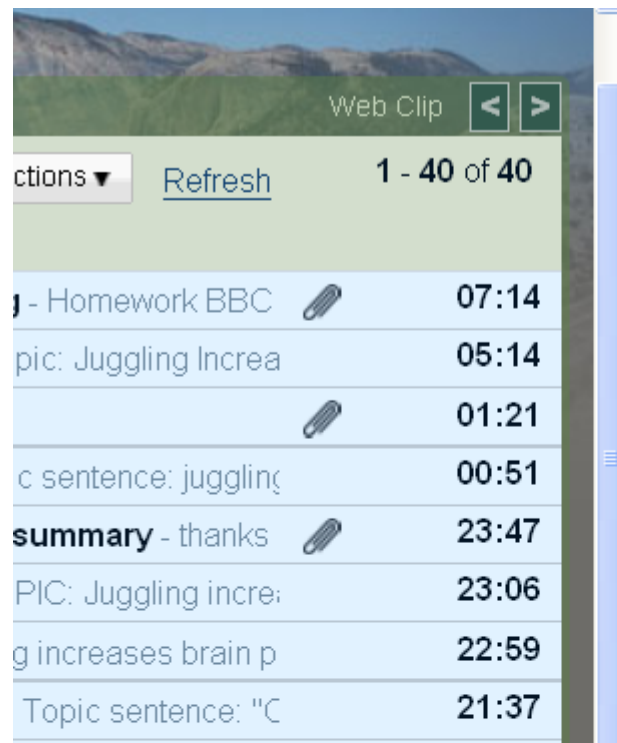

All good things have an end

And welcome back to the class.

Recap

- *Homework 1: What I want to achieve in this class*
- *Homework 2: Juggling Increases Brain Power*

-- all handed in?

What I wanted to achieve...

- *We have learned English writing over three years in Wenzao. But it seems that it didn't help me a lot in this course. I still can't write a simple paragraph without making mistake. And it takes me lots of time on writing no matter it's a long paragraph or not. I can't even image that writing an essay all by myself. So I really want to learn how to write efficiently and correctly and also how to write a interesting paragraph.*

Juggling: excerpts

- From article “Juggling Increases Brain Power” on BBC News
- *Summary:*
- *This article tell us about juggling can increase our brain power. The team from Oxford's Department of Clinical Neurology used a diffusion MRI which is able to measure the movement of water molecules in the tissues of the brain. And the scientists studied a group of 24 healthy young adults, none of whom could juggle.*
- *Dr Heidi Johansen-Berg said: "We chose juggling purely as a complex new skill for people to learn."*

- *Controlling idea : scientist DO a reSEAerch to SHOW/ TO SUGGEST juggling can increase the brain*
- *Topic sentence : In the journal, Nature Neuroscience, the scientists say they saw a 5% increase in white matter*

Today:

Chapter 1

Chapter 2

Report: wenzao week

1. WHAT DID YOU DO/SEE? WHAT MADE YOU TICK?
2. LIST SOME IDEAS
