

Earth Science Chapter 10: Part II of Exam

There is a lot of information in this chapter, so rather than making students memorize the entire geologic time scale with names, dates and organisms that were present, I have decided to add an additional assignment. Part of the assignment must be done at home and then brought into class to be worked on. Below is a list of the supplies that each student **MUST** bring in by **Thurs Dec 11, 2008**. Any additional supplies are welcome to be brought in.

Poster board (any size)
Coloring utensils
Colored paper
Glue or tape
Scissors

Below is a list of all students and each era that they will be completing.

Paleozoic Era	Mesozoic Era	Cenozoic Era
William McBratney	Gabby McElveen	Palmer Jones
Ellis Burner	Carson Harwell	KB Pittard
Hayley Hassler	Caroline Agnew	CJ Waldron
Courtney Alcorn	Davis Lee	Jaycie Lawson
Michael Pavy	Jesse Motte	Thomas Chapman
Boone Aiken	Emily Halbert	Mary Rutledge Cox
Hannah Hopewell	Sarah Nell Harwell	David McElveen
Mark Buyck	Will Naso	Emery Buckhouse
Janie Fuller	Myles Abshire	

Prior to Thurs Dec 11, 2008, students will need to do some research on their era. Research should include:

- types of organisms that were present at the beginning, middle and end of the era
- names of a few organisms
- pictures or drawings of organisms (both land and sea, plant and animal)
- climate of the era
- what event(s) brought about the end of the era
- names of each period in the era and what important events occurred in each
- dates of the era and all periods

Be aware that most of the above information is found in your textbook. You do NOT need to create a list of sources. You are welcome to type the information or write it on your poster. On Thurs Dec 11, 2008, you will be putting together your poster. Points will be deducted from your grade if you do not have the above required materials on the day of the assignment. Students should be able to complete most if not all of their poster in class on Thursday, but if they need more time, they have an extra night to work on them. **Finished posters are due Fri Dec 12, 2008.**

Grading Rubric: **This sheet MUST be handed in with your poster**

Materials were brought in on Thurs Dec 11, 2008	/10
Proper era was done	/2
Types of organisms that were present in the era	/5
Pictures or drawings of organisms (both land and sea, plant and animal)	/2
Climate of the era	/2
What event(s) brought about the end of the era	/4
Names of each period in the era and what important events occurred in each	/5
Dates of the era and all periods	/5
Name and appearance (neatness and creativity)	/5
TOTAL	/40
